Contrary to our perception of the centrality of the churches in English life in the nineteenth century, the disappointing results of the 1851 Religious Census led religious leaders to seek a variety of ways to increase religious allegiance as the century progressed. The apparent apathy and lack of interest in formal religion on the part of the working classes was particularly galling, and the various denominations tried hard to attract them through evangelical missions as well as social and charitable ventures which sometimes competed with religious concerns, to the latter's detriment. This book traces the motivations, concerns and efforts of the churches, particularly in the period between 1870 and 1920, and the ambivalent responses of ordinary people. The Education Act of 1870 led to the churches losing their hold on the education of the young, a consequence foreseen by many church leaders, but unable to be prevented. By 1920 it was apparent that the churches' optimism regarding an increased role with a war-weary population would not be fulfilled. The focus is on the city of Leeds, representative of the industrialised urban areas with burgeoning populations which proved to be such a challenge to the churches, at the same time stimulating them to ever-greater efforts.

Volume 1 - Lyons to Mulberry During the 1800's, the area along and between the East and West Navidad Rivers in Texas was known as the Navidad Country. A majority of the pioneers came from the Old South, some arriving with Stephen F. Austin's Old Three Hundred. Once settled, they proceeded to clear the land, till the soil and build homes and towns. The aftermath of the Civil War brought great change and loss to these once prosperous people. Information and photographs for over 100 of the families and their relationships is made available for the first time, in addition to descriptive accounts of the once thriving

towns of the area.

In telling the life of Harriet, Dred's wife and co-litigant in the case, this book provides a compensatory history to the generations of work that missed key sources only recently brought to light. Moreover, it gives insight into the reasons and ways that slaves used the courts to establish their freedom. --from publisher description.

First published in 1982, this study explores the dynamics of class formation during the vital decades between 1830 and 1914, when a rising urban industrial order was developing in complex interdependence with a declining rural agrarian order. The book follows the divergent paths of two cities - Birmingham and Sheffield - in their social development. These paths reflect the complex process of conflict and compromise as the 'old' order was gradually replaced by the 'new'. It studies in detail many aspects of social life that were affected by these changes such as education, public administration, political structures, public administration, religion, the professions, popular culture and family. This book will be of interest to those studying Victorian history and sociology.

A fascinating and richly illustrated book exploring speeches made in Birmingham that changed history. Meet some of Britain's most famous orators. The book reflects the importance of oratory in making a political argument. It may in a sound-bite era be a dying art but these speeches fulfil the first requirement of successful rhetoric, that it be a reasoned argument to persuade its audience.

----- It is striking how many nationally significant speeches have been made in Birmingham over the past two hundred years. This book looks at ten episodes when a speech in Birmingham challenged the rest of the country to embrace change and reform. More than any other city it represents Britain's provincial voice across the period. The book reflects the importance of oratory in making a political argument. It may in a sound-bite era be a dying art but these speeches fulfil the first requirement of successful rhetoric, that it be a reasoned argument to persuade its audience. ----- On 27th October 1857, MP John Bright addressed a crowded Birmingham Town Hall. Already a famous politician and orator, expectations were high that he would deliver a newsworthy speech. So much so, The Times chartered a special night train to deliver his text in time for the morning editions. And Bright didn't disappoint. The speech, a passionate call

for universal suffrage, marked a fundamental turning point in 19th century electoral reform, and forms a powerful illustration of the impact a great speech- and speaker- can have on the history of a nation. *Speeches that Changed Britain: Oratory in Birmingham* takes a number of speeches, all made in Birmingham in the last two hundred years, and explores their impact on local and national stages. From the charismatic speakers themselves, to the words they used, the causes they fought for, and the mercurial relationship between orator and audience, author Andrew Reekes examines the factors that make a great speech. Many of the speakers considered were the most famous orators of their time, and their speeches illustrate contemporary concerns: from Thomas Attwood advocating Parliamentary reform in 1832 to crowds of 200,000; Feargus O'Connor addressing Chartist rallies; the Chamberlain dynasty, Joseph and Neville, opposing Home Rule and confronting Hitler; to controversial characters Oswald Mosley and Enoch Powell outlining their personal visions. The book closes with a very recent speech by David Cameron which continues the tradition of powerful speeches made in the city. Reekes paints a clear picture of Birmingham itself as a stronghold of radical politics and social reform, one that generated and attracted famous orators. Their presence has meant that Birmingham has played a profound role in setting the national political mood and agenda. Resonating with the text of these great speeches, Reekes' fascinating and important book captures vividly a lost age of political oratory and passionate public advocacy, and provides an extraordinary insight into the progress of

political and social reform in Britain across the last two hundred years. *Conflict and Compromise* Stanford University Press
 Claiborne Fox Jackson (1806-1862) remains one of Missouri's most controversial historical figures. Elected Missouri's governor in 1860 after serving as a state legislator and Democratic party chief, Jackson was the force behind a movement for the neutral state's secession before a federal sortie exiled him from office. Although Jackson's administration was replaced by a temporary government that maintained allegiance to the Union, he led a rump assembly that drafted an ordinance of secession in October 1861 and spearheaded its acceptance by the Confederate Congress. Despite the fact that the majority of the state's populace refused to recognize the act, the Confederacy named Missouri its twelfth state the following month. A year later Jackson died in exile in Arkansas, an apparent footnote to the war that engulfed his region and that consumed him. In this first full-length study of Claiborne Fox Jackson, Christopher Phillips offers much more than a traditional biography. His extensive analysis of Jackson's rise to power through the tangle that was Missouri's antebellum politics and of Jackson's complex actions in pursuit of his state's secession complete the deeper and broader story of regional identity--one that began with a growing defense of the institution of slavery and which crystallized during and after the bitter, internecine struggle in the neutral border state during the American Civil War. Placing slavery within the realm of western democratic expansion rather than of plantation agriculture in border slave states such as Missouri, Phillips

argues that southern identity in the region was not born, but created. While most rural Missourians were proslavery, their "southernization" transcended such boundaries, with southern identity becoming a means by which residents sought to reestablish local jurisdiction in defiance of federal authority during and after the war. This identification, intrinsically political and thus ideological, centered--and still centers--upon the events surrounding the Civil War, whether in Missouri or elsewhere. By positioning personal and political struggles and triumphs within Missourians' shifting identity and the redefinition of their collective memory, Phillips reveals the complex process by which these once Missouri westerners became and remain Missouri southerners. Missouri's Confederate not only provides a fascinating depiction of Jackson and his world but also offers the most complete scholarly analysis of Missouri's maturing antebellum identity. Anyone with an interest in the Civil War, the American West, or the American South will find this important new biography a powerful contribution to our understanding of nineteenth-century America and the origins--as well as the legacy--of the Civil War.

The Researcher History West Midlands There have been Baptist churches in the Midlands since at least 1626. This book describes their story from Stoke-on-Trent in the north, to Droitwich in the south, and from Rugby in the east, to Oswestry in the west, and covers the whole of the large West Midland conurbation surrounding Birmingham. This volume includes the whole range of Baptists who have arisen from different sources over the generations, whether or not they have been in organised Association life. Local historians will gain an insight into a vital aspect of their community's story. Original texts have been used to let people and their churches speak for themselves. The story has been divided into periods of time, reaching 2009 when the office of the Heart of England Baptist Association (which covers most of the Baptist churches in this account) made a significant move to a new location in Selly Oak. Within each period important topics are highlighted, such as worship, social impact, church planting, etc. in this way considerable growth and important changes over the years are detailed. Some exciting stories emerge, such as the leading role Baptists had in the campaign to abolish slavery. The publication of Deep Roots, Living Branches is a contribution to the celebration of the 400th anniversary of the start of the world's first Baptist church among English émigrés in

Amsterdam in 1609. The book includes numerous line-drawings by the talented artist, the late Violet Kennard of Coventry.

Prophet' John Wroe (1782-1863), found fame through his many predictions, his preaching and the establishment of the Christian Israelite Church in the early 1820s. Edward Green places Wroe's life and career in the context of an industrialised society struggling to find values and needing to believe in themselves as the Chosen People.

John Charles Ryle became the undisputed leader and spokesman of the evangelical party within the Church of England in the last half of the nineteenth century, and his works continue to be read by evangelicals of various denominational stripes more than a century after his death. Accordingly, he is often portrayed as "an old soldier" of a heroic cause. While this view of Ryle holds some merit, it often obscures the complexity and dynamism of a most remarkable man. In this intellectual biography, Bennett Wade Rogers analyzes the complicated life and times of a man variously described as traditional, moderate, and even radical during his fifty-eight-year ministry. Ryle began his ministerial career as a rural parish priest; he ended it as a bishop of the second city of the British Empire. In

the time between, he became a popular preacher, influential author, effective controversialist, recognized party leader, stalwart church defender, and radical church reformer. Table of Contents: 1. Christian and Clergyman 2. Preacher 3. Pastor 4. Controversialist 5. A National Ministry 6. Bishop 7. Who Was J. C. Ryle? Yorkshire Returns of the 1851 Census of Religious Worship Boydell & Brewer Ltd The region along Deep River in central North Carolina once boasted a small but significant coal mining industry that from the early 1800s to the end of the 20th century provided fuel for manufacturing and domestic use. Confronted by natural obstacles and other challenges-- including a devastating explosion in 1925 that killed 53 men and boys-- entrepreneurs made numerous attempts (some successful, some not) to harness the power of coal in a state still defining itself in a modernizing nation. Iron forges and hearths required ample supplies of coal to meet local demand, and the Deep River deposits provided them when no others existed.

A close reading of the life and letters of William Hale White shows that some misunderstandings have arisen in the interpretation of this important figure. The book offers such significant issues as doubt, loss of faith, and crises over vocation and church. This work represents a revisionist approach to William Hale White. It corrects previous studies at some important points, questions existing interpretations, and employs new theoretical strategies alongside fresh research in primary sources.

A detailed survey of the Anglican mission

to the coalfields in an era where rapid industrialisation crucially affected the old ecclesiastical structures. In 1860 the Diocese of Durham launched a new mission to bring Christianity - and specifically Anglicanism - to the teeming population of the Durham coalfield. Over the preceding fifty years the Church of England had become increasingly marginalised as the coalfield population soared. Parish churches that had been built to serve a scattered, rural medieval population were no longer sufficiently close - or relevant - to the new industrial townships that were being constructed around the coalmines. The post-1860 mission was a belated attempt to reach out to the new coalfield population, and to rescue them from the forces of Methodism, labour militancy and irreligion. It was posited on the need to build new churches, to delineate new parishes and to recruit a new type of clergyman: working-class and down-to-earth in origin and outlook, and somebody who could make an empathetic connection with his new parishioners. This book is a detailed exploration of the way in which the Church of England in Durham handled its mission. It follows the Church's relationship with the coalfield, which ranged from an early-nineteenth-century aloofness to an early-twentieth-century identification which many church leaders considered had gone too far, and in so doing reveals how the Durham experience relates to national attempts to maintain Anglicanism's relevance and presence in an increasingly secular and sceptical society. This sweeping, richly evocative study examines the origins and legacies of a flourishing captive exchange economy within and among native American and Euramerican communities throughout the Southwest Borderlands from the Spanish colonial era to the end of the nineteenth century. Indigenous and colonial traditions of capture, servitude, and kinship met and meshed in the borderlands, forming a "slave system" in which victims symbolized social wealth, performed services for their masters, and produced material goods under the threat of violence. Slave and livestock raiding and trading among Apaches, Comanches, Kiowas, Navajos, Utes, and Spaniards provided labor resources, redistributed wealth, and fostered kin connections that integrated disparate and antagonistic groups even as these practices renewed cycles of violence and warfare. Always attentive to the corrosive effects of the "slave trade" on Indian and colonial societies, the book also explores slavery's centrality in intercultural trade, alliances, and "communities of interest" among groups often antagonistic to Spanish, Mexican, and American modernizing strategies. The extension of the moral and military campaigns of the American Civil War to the Southwest in a regional "war against slavery" brought differing forms of social stability but cost local communities much of their economic vitality and cultural flexibility.
