### Spaces and Identities in Border Regions

Basic Books

Buckle up! Max and her flock take on their most daring rescue mission yet in James Patterson's #1 bestselling Maximum Ride series. Someone—or something—is decimating ships and sea life off Hawaii's coast, and Max and her flock find themselves sucked into the Navy's top-secret investigation of the catastrophe. Their objective: rescue Max's activist mom from a wicked subterranean enemy. The hitch: They must dive deep into dark waters, where gruesome evil dwells . . . and for high-flying Maximum Ride, could there be anything more terrifying than being trapped in the great abyss? With

sky-high thrills, this soaring adventure takes Maximum Ride and the Flock into terrifying new territory—fans, hold your breath!

**The WORN Archive** jimmy patterson "Sentimental, heartfelt...the exploration of Henry's changing relationship with his family and with Keiko will keep most readers turning pages...A timely debut that not only reminds readers of a shameful episode in American history, but cautions us to examine the present and take heed we don't repeat those injustices."-- Kirkus Reviews "A tender and satisfying novel set in a time and a place lost forever, *Hotel on the Corner of Bitter and Sweet* gives us a glimpse of the damage that is caused by war--not the sweeping damage of the battlefield, but the cold, cruel damage to the hearts and humanity of individual people. Especially relevant in today's world, this is a

beautifully written book that will make you think. And, more importantly, it will make you feel." -- Garth Stein, *New York Times* bestselling author of *The Art of Racing in the Rain* "Jamie Ford's first novel explores the age-old conflicts between father and son, the beauty and sadness of what happened to Japanese Americans in the Seattle area during World War II, and the depths and longing of deep-heart love. An impressive, bitter, and sweet debut." -- Lisa See, bestselling author of *Snow Flower and the Secret Fan* In the opening pages of Jamie Ford's stunning debut novel, *Hotel on the Corner of Bitter and Sweet*, Henry Lee comes upon a crowd gathered outside the Panama Hotel, once the gateway to Seattle's Japantown. It has been boarded up for decades, but now the new owner has made an incredible discovery: the belongings of Japanese families, left when they were rounded up

and sent to internment camps during World War II. As Henry looks on, the owner opens a Japanese parasol. This simple act takes old Henry Lee back to the 1940s, at the height of the war, when young Henry's world is a jumble of confusion and excitement, and to his father, who is obsessed with the war in China and having Henry grow up American. While "scholarshipping" at the exclusive Rainier Elementary, where the white kids ignore him, Henry meets Keiko Okabe, a young Japanese American student. Amid the chaos of blackouts, curfews, and FBI raids, Henry and Keiko forge a bond of friendship—and innocent love—that transcends the long-standing prejudices of their Old World ancestors. And after Keiko and her family are swept up in the evacuations to the internment camps, she and Henry are left only with the hope that the war will end, and that their promise to each other will be kept. Forty years later, Henry Lee is certain that the parasol belonged to Keiko. In the hotel's dark dusty basement he begins looking for signs of the Okabe family's belongings and for a long-lost object whose value he cannot begin to measure. Now a widower, Henry is still trying to find his voice—words that might explain the actions of his nationalistic father; words that might bridge the gap between him and his modern, Chinese American son; words that might help him confront the choices he made many years ago. Set during one of the most conflicted and volatile times in American history, *Hotel on the Corner of Bitter and Sweet* is an extraordinary story of commitment and enduring hope. In Henry and Keiko, Jamie Ford has created an unforgettable duo whose story teaches us of the power of forgiveness and the human heart. **BONUS:** This edition contains a *Hotel on the Corner of Bitter and Sweet* discussion guide and an excerpt from Jamie Ford's *Love and Other Consolation Prizes*.

**C791** Donna McDonald

Big, bad and purple. It was supposed to be a simple job. Grab some specimens from Earth and sell them on the interstellar black markets. In and out, with no one the wiser, except Tren accidentally abducts a human. A barbaric female, who doesn't know how to be quiet and obey. That will affect her selling price especially since she only possesses two breasts, and a single mouth. Yet, in spite of her shortcomings there is something about her spitfire nature that intrigues him. Maybe he should keep her. He's definitely not keen on getting rid of her after he seduces her. A space pirate doesn't usually fall in love, but when an enemy decides to take

Megan, Tren realizes he will do anything to get her back  
Genre: science fiction romance, space opera, comedy, humor, space adventure, space exploration, sci-fi romance, fantasy romance, paranormal romance, futuristic romance, alpha male

*The Essential Cult TV Reader* is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. Once defined by limited viewership, cult TV has developed its own identity, with some shows gaining large, mainstream audiences. By exploring the defining characteristics of cult TV, *The Essential Cult TV Reader* traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as *Star Trek*, *The Avengers*, *Dark Shadows*, and *The Twilight Zone* to popular contemporary shows such as *Lost*, *Dexter*, and *24*, addressing the cultural context that allowed the development of the phenomenon. The contributors investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. *The Essential Cult TV Reader* answers many of the questions surrounding the form while revealing emerging debates on its future.

A PDF version of this book is available for free in open access via the OAPEN Library platform, [www.oapen.org](http://www.oapen.org). *Cyborgs in Latin America* explores the ways cultural expression in Latin America has grappled with the changing relationships between technology and human identity.

Advances in Safety, Reliability and Risk Management Open Road Media

Use machine learning to understand your customers, frame decisions, and drive value The business analytics world has changed, and Data Scientists are taking over. Business Data Science takes you through the steps of using machine learning to implement best-in-class business data science. Whether you are a business leader with a desire to go deep on data, or an engineer who wants to learn how to apply Machine Learning to business problems, you'll find the information, insight, and tools you need to flourish in today's data-driven economy. You'll learn how to: Use the key building blocks of

Machine Learning: sparse regularization, out-of-sample validation, and latent factor and topic modeling Understand how use ML tools in real world business problems, where causation matters more than correlation Solve data science programs by scripting in the R programming language Today's business landscape is driven by data and constantly shifting. Companies live and die on their ability to make and implement the right decisions quickly and effectively. Business Data Science is about doing data science right. It's about the exciting things being done around Big Data to run a flourishing business. It's about the precepts, principals, and best practices that you need know for best-in-class business data science.

Spatial and identity research operates with differentiations and relations. These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge. Applying this approach, the authors of this volume investigate spatial and identity constructions in cross-border contexts as they appear in everyday, institutional and media practices. The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation. The studies base upon empirical surveys conducted in Germany, France, Belgium and Luxembourg.

With the demand for more advanced fighter aircraft, relying on unstable flight mechanical characteristics to gain flight performance, more focus has been put on model-based system engineering to help with the design work. The flight control system design is one important part that relies on this modeling. Therefore, it has become more important to develop flight mechanical models that are highly accurate in the whole flight envelope. For today's modern fighter aircraft, the basic flight mechanical characteristics change between linear and nonlinear as well as stable and unstable as an effect of the desired capability of advanced maneuvering at subsonic, transonic and supersonic speeds. This thesis combines the subject of system identification, which is the art of building mathematical models

of dynamical systems based on measurements, with aeronautical engineering in order to find methods for identifying flight mechanical characteristics. Here, some challenging aeronautical identification problems, estimating model parameters from flight-testing, are treated. Two aspects are considered. The first is online identification during flight-testing with the intent to aid the engineers in the analysis process when looking at the flight mechanical characteristics. This will also ensure that enough information is available in the resulting test data for post-flight analysis. Here, a frequency domain method is used. An existing method has been developed further by including an Instrumental Variable approach to take care of noisy data including atmospheric turbulence and by a sensor-fusion step to handle varying excitation during an experiment. The method treats linear systems that can be both stable and unstable working under feedback control. An experiment has been performed on a radio-controlled demonstrator aircraft. For this, multisine input signals have been designed and the results show that it is possible to perform more time-efficient flight-testing compared with standard input signals. The other aspect is post-flight identification of nonlinear characteristics. Here the properties of a parameterized observer approach, using a prediction-error method, are investigated. This approach is compared with four other methods for some test cases. It is shown that this parameterized observer approach is the most robust one with respect to noise disturbances and initial offsets. Another attractive property is that no user parameters have to be tuned by the engineers in order to get the best performance. All methods in this thesis have been validated on simulated data where the system is known, and have also been tested on real flight test data. Both of the investigated approaches show promising results.

**When A Beta Roars** Studio Fun International

Yearning for a life of leisure? In 24 chapters representing each hour of a typical working day, this book will coax out the loafer in even the most diligent and schedule-obsessed worker. From the founding editor of the celebrated magazine about the freedom and fine art of doing nothing, *The Idler*, comes not simply a book, but an antidote to our work-obsessed culture. In *How to Be Idle*, Hodgkinson presents his learned yet whimsical argument for a new, universal standard of living: being happy doing

nothing. He covers a whole spectrum of issues affecting the modern idler—sleep, work, pleasure, relationships—bemoaning the cultural skepticism of idleness while reflecting on the writing of such famous apologists for it as Oscar Wilde, Robert Louis Stevenson, Dr. Johnson, and Nietzsche—all of whom have admitted to doing their very best work in bed. It's a well-known fact that Europeans spend fewer hours at work a week than Americans. So it's only befitting that one of them—the very clever, extremely engaging, and quite hilarious Tom Hodgkinson—should have the wittiest and most useful insights into the fun and nature of being idle. Following on the quirky, call-to-arms heels of the bestselling *Eat, Shoots and Leaves: The Zero Tolerance Approach to Punctuation* by Lynne Truss, *How to Be Idle* rallies us to an equally just and no less worthy cause: reclaiming our right to be idle.

*Intentional Abduction* McGraw Hill Professional

When a friend drags Agatha “Aggie” Bowles to a romance convention, all she wants to do is find some new authors and a quiet spot to read. Instead of relaxing with a book, she ends up kidnapped by a steampunk cyborg. Which is as exciting as it sounds. Except for the fact he's more interested in the cog hanging around her neck than Aggie herself. He'll do anything to get his hands on it. Problem is other people want it, too. Can this cyborg relinquish a priceless treasure for love? Genre: cyborg romance, steampunk romance, science fiction romance, abduction romance, alien contact, space opera

This book gathers outstanding research papers presented at the International Joint Conference on Advances in Computational Intelligence (IJCACI 2020), organized by Daffodil International University (DIU) and Jahangirnagar University (JU) in Bangladesh and South Asian University (SAU) in India. These proceedings present novel contributions in the areas of computational intelligence and offer valuable reference material for advanced research. The topics covered include collective intelligence, soft computing, optimization, cloud computing, machine learning, intelligent software, robotics, data science, data security, big data analytics, and signal and natural language processing.

*Vacation Hell (Princess of Hell 4)* Avion

When Muriel goes to the beach, instead of collecting seashells like a normal person, she picks up a new man. A merman... Juggling a happily ever after is harder than

it looks especially when it involves a fallen angel who is my soul mate, a hunky cat shifter, who stole my heart and a darkly delicious vampire who is like that piece of forbidden chocolate you just can't resist. Add in a precocious little girl, who is totally spoiled rotten—not surprising given nana and poppa were Mother Earth and the Devil—and my life was a never ending series of dramas, foot stomping, yelling and tears. By me. I never knew being a grown up could be so much damned work which is why I decided we needed a vacation. But of course, being Lucifer's daughter, that didn't turn out as expected. Now I've got to figure out if my bathtub is big enough for a hunky merman—and is there room in my heart for one more?

Genre: paranormal romance, fantasy romance, gothic, romantic comedy, alpha male, romantic adventure, urban fantasy, hero knight, demons, angels, strong heroine, vampire, mermaid

*Aeon Flux* CRC Press

Marcus 582 is the third book in this futuristic Science Fiction and Fantasy series from USA Today Bestselling Author Donna McDonald. No matter what his cybernetic mind concludes, nothing in Marcus Kell's restored life is logical. Marcus 582 still remembers all the things Kyra says a restored cyborg is supposed to forget. Things like what it was like to be captured and tortured while fighting to save a country that a decade later doesn't care about him. But then, neither does his former wife. She gave up on him long ago. Now she's remarried and his children think someone else is their father. As far as he's concerned, Marcus doesn't have much in his life worth living for except the task of guarding Rachel 235. The woman irrationally refuses to accept that she's been converted into some crazy cyber scientist's new cyborg prototype. Accept it or not though, her denial won't stop the bad guys from trying to re-capture her. Just ask Peyton. Sympathy is a stretch but Marcus understands why Rachel doesn't want to be a cyborg. After all, her conversion wasn't voluntary like his. But Rachel wants a life without any cyborgs in it, including herself, which will never be her reality again. It's time she got used to that fact. Why is he so determined? Because he's already lost all he can stand to lose in his life. He refuses to lose Rachel too. ABOUT THIS SERIES - Set in the future, this science fiction action and adventure series explores military boundaries in a tale of created cyborgs and genetic engineering. It contains strong romance elements for paranormal, science fiction, and urban fantasy romance fans.

Press

When the order is given to terminate F814, she finds herself not in agreement. Blame her defective programming, but she's not about to let a human destroy her. But freedom is lonely until Solus and his cyborg friends shows up and rescue her from a mining asteroid. Emotions are for the weak, at least that's Solus' motto until he comes across Fiona. She thinks she's just a robot, but he shows her she's more than just a machine. And in the process, discovers love. But before they can truly come to grips with what they are, first they must survive the human military that is determined to eradicate them all. Like Hell. If there's one thing cyborgs understand all too well, it's how to fight, and survive. Cyborgs More than Machines series: C791, F814, B785, Aramus, Seth, Adam, Avion Genre: A Cyborg romance with dark humor, an alpha male, some humans you'll hate and a cool twist that will leave you craving for a machine lover of your own. (genetic engineering, sci-fi romance, space opera, fantasy romance, futuristic romance, dark romance, paranormal romance, sfr, cyborg romance)

Color and complete the stickers that come with this PJ Masks coloring-and-activity book! Kids will love the more than 200 stickers of the PJ Masks heroes, villains,

vehicles, and more that come with this book! The pages are also chock-full of images to color, stickers to color, and activities to complete! Featuring all the latest characters and their adventures, PJ Masks: Heroes Stick Together captures all the excitement and energy of the popular TV show and offers fans hours of creative, hands-on fun!

**Proceedings of International Joint Conference on Advances in Computational Intelligence** Harper Collins

In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—Staying

with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time. The Essential Cult TV Reader Zondervan Machines aren't supposed to feel, but this cyborg can't help falling in love. Assigned as a specimen collector for a captured cyborg, Chloe is intrigued by the machine disguised as a man. Kidnapped during his daring escape, he shows her that despite the chip in his brain, his humanity is not completely lost. Formerly known as unit X109GI, Joe is on a quest to discover his origin. While he doesn't find the answers he's looking for, he does discover that affection and lust aren't just for humans. But when it comes to a battle between logic and love, which side will the cybernetic organism—once a man—choose? Evaluating his feelings will have to wait though because the military isn't done with Joe. But their threats against him pale in comparison before the shocking discovery of project C791, the revelation of which stuns the rebel cyborgs—and ignites a fury for vengeance. Cyborgs More than Machines series: C791, F814, B785, Aramus, Seth, Adam, Avion Genre: A Cyborg romance with dark humor, an alpha male, some humans you'll hate and a cool twist that will leave you craving for a machine lover of your own. (genetic engineering, sci-fi romance, space opera, fantasy romance, futuristic romance, dark romance, paranormal romance, sfr, cyborg romance)
