The Pratt & Whitney Aircraft Company (P&W) was founded in 1925 by Frederick B. Rentschler, who had previously been the President of Wright Aeronautical. He brought with him some of Wright's best designers and the new team quickly came up with their first design, the R-1340 Wasp. Pratt & Whitney Wasp series - Wikipedia The Pratt & Whitney R-2800 Double Wasp is an American twin-row, 18-cylinder, air-cooled radial aircraft engine with a displacement of 2,800 cubic inches, and is part of the long-lived Wasp family of engines. The R-2800 saw widespread use in many important American aircraft during and after World War II. During the war years, Pratt & Whitney continued to develop new ideas to upgrade the engine, including water injection for takeoff in cargo and passenger planes and to give emergency power in comb Pratt & Whitney R-2800 Double Wasp - Wikipedia The Pratt & Whitney R-4360 Wasp Major is an American 28-cylinder four-row radial piston aircraft engine designed and built during World War

II, and the largest-displacement aviation piston engine to be mass-produced in the United States. It was the last of the Pratt & Whitney Wasp family, and the culmination of its maker's piston engine technology, but the war was over before it could power airplanes into combat. It did, however, power many of the last generation of large piston-engined aircraft Pratt & Whitney R-4360 Wasp Major - Wikipedia The Pratt & Whitney R-985 Wasp Junior is a series of nine-cylinder, air-cooled, radial aircraft engines built by the Pratt & Whitney Aircraft Company from the 1930s to the 1950s. These engines have a displacement of 985 in³; initial versions produced 300 hp (220 kW), while the most widely used versions produce 450 hp (340 kW). The History of the Pratt & Whitney R-985 & The List of ... Pratt & Whitney R985 radial engine restoration photos and video of initial start. Radial Engine Startup Pratt & Whitney R985 (Wasp Junior) ... The Pratt & Whitney R-1340 Wasp was a 9 cylinder, single-row, air-cooled radial engine with horsepower ranging from 410 hp to 600 hp, depending on the model and configuration. It was used in a range of aircraft that included the North American AT-6 , Boeing P-26 , and Boeing 247 . Pratt & Whitney R-1340 Wasp - Aviation History The Pratt & Whitney Radial Engine on our SNJ-5 is a R-1340 model with 600 horsepower. These radials are sometimes referred to as "round motors" because of the way cylinders are arrayed about the prop shaft. The P&W R-1340 has 9 cylinders. General characteristics of the Pratt & Whitney Radial Engine: Type: Nine-cylinder single-row supercharged air-cooled radial engine; Bore: 5.75 in (146 mm) Stroke: 5.75 in (146 mm) Displacement: 1,344 in³ (22 L) Diameter: 51.75 in (1.314 m) Pratt & Whitney Radial Engine: R-1340 | Pearl Harbor Warbirds The R-2800 Double Wasp is an American made, 18-cylinder radial engine which was the most powerful engine of its type in the world during that time. Designed in early 1930s and first tested in 1937, it is still considered one of the best piston engines ever designed. Arriving right before World War II, the original 2,000 horsepower it generated made it ideal for placement in war planes. Pratt & Whitney R-2800 Double Wasp Cutaway: How It Works ... The Pratt & Whitney PW4000 is a family of high-bypass turbofan aircraft engines produced by Pratt & Whitney as the successor to the JT9D. It was first run in April 1984, was FAA certified in July 1986, and was introduced in June 1987. With thrust ranging from 50,000 to 99,040 lbf (222 to 441 kN), it is used on many wide-body airliners Pratt & Whitney PW4000 - Wikipedia Go to the Pratt & Whitney Customer Training website or the Pratt & Whitney Canada (PWC) Customer Training website to learn more about training opportunities. ... Pratt & Whitney R-2800-65W First run in 1937, the R-2800 was America's first 18-cylinder radial engine design. The Double Wasp was more powerful than the world's only other modern eighteen, the Gnome-Rhone 18L of 3,442 cubic inches (56.4 L), but it was much smaller and heat dissipation was a greater problem. Pratt & Whitney R-2800-65W - Air Victory Museum The Engine The Pratt & Whitney R-4360-59B is a fixed radial engine of 28 cylinders arranged in 4 rows of 7 cylinders in each row. Of all the models of the R-4360 engines produced by Pratt & Whitney and the Ford Motor Company, the dash 59B was the most numerous with 4,260 engines manufactured in the 1950s. R-4360 Operations The V2500 engine is designed and manufactured by International Aero Engines, a global partnership of aerospace leaders including Pratt & Whitney, Japanese Aero Engine Corporation and MTU Aero Engines. Discover V2500 GP7200 The GP7200 is derived from two of the most successful wide body engine programs in aviation history. Commercial Engines - Pratt & Whitney In 2016, the American Society of Mechanical Engineers celebrated just such an engine. The society designated the Pratt & Whitney R-1340 Wasp a technology landmark, the organization's highest award, because the Wasp singlehandedly brought about a leap forward in aircraft performance and economics. The tale of its development is still fascinating.
