*Traditions & Encounters: A Global Perspective on the Past*  
McGraw-Hill

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

Combining rigorous academic scholarship with the experience of a senior Pentagon policymaker, Mara E. Karlin explores the key national security issue of our time: how to effectively build partner militaries. Given the complex and complicated global security environment, declining U.S. defense budgets, and an increasingly connected (and often unstable) world, the United States has an ever-deepening interest in strengthening fragile states. Particularly since World War II, it has often chosen to do so by strengthening partner militaries. It will continue to do so, Karlin predicts, given U.S. sensitivity to casualties, a constrained fiscal environment, the nature of modern nationalism, increasing transnational security threats, the proliferation of fragile states, and limits on U.S. public support for military interventions. However, its record of success is thin. While most analyses of these programs focus on training and equipment, *Building Militaries in Fragile States* argues that this approach is misguided. Instead, given the nature of a fragile state, Karlin homes in on the outsized roles played by two key actors: the U.S. military and unhelpful external actors. With a rich comparative case-study approach that spans Europe, Asia, and the Middle East, Karlin unearths provocative findings that suggest the traditional way of working with foreign militaries needs to be rethought. Benefiting from the practical eye of an experienced national security official,

her results-based exploration suggests new and meaningful findings for building partner militaries in fragile states.

Fascinating philosophical inquiry into post-Holocaust representations of the event in political theory, ethics, and aesthetics, and an assessment of the limitations and promise of philosophical 'witnessing' in relation to those issues

This concise and accessible introduction to Strauss's thought provides, for wider audience, a bridge to his more complex theoretical work. Editor Pangle has gathered five of Strauss's previously unpublished lectures and five hard-to-find published writings and has arranged them so as to demonstrate the systematic progression of the major themes that underlay Strauss's mature work. "[These essays] display the incomparable insight and remarkable range of knowledge that set Strauss's works apart from any other twentieth-century philosopher's."—Charles R. Kesler, *National Review*

*A Study in Jewish Philosophy of History* Simon and Schuster

Are historians story-tellers? Is it possible to tell true stories about the past? These are just two of the questions raised in this comprehensive collection of texts about philosophy, theory and methodology of writing history.

*Kaplan AP World History 2016* Macmillan Higher Education

Kirkman sheds new light on the polyphonic Mass, exploring the hidden meanings within its music and its legacy today.

*Crisis, Collapse, Militarism and Civil War* Cambridge University Press

The essays are tied together by their explorations of connections (primarily among technology, society, and knowledge) and by their general focus on modern "high" technology. They also share an emphasis on the complexity of technological formation and fixation and on the role of belief (especially self-validating belief) in technological change.

*Glencoe World History, Student Edition* University of Chicago Press

A fascinating and thorough account of the Egyptian process of mummification and efforts to safeguard places of burial against thieves.

### **A Bibliographical Guide** World History

Laced with brilliant insights, broad in its view of the interaction of culture and theology, this book gives new resonance to old and important questions about the meaning of the Bible.

The eighteenth century was a crucial era in modern Iranian history, but up to now it has been little studied outside Iran. In *Crisis, Collapse, Militarism and Civil War*, Michael Axworthy has gathered leading experts on this period from around the world to provide a multifaceted account of this fascinating, dramatic, and turbulent era. The volume covers economics, intellectual history, military developments, politics, and the visual arts. In the 1720s, after the collapse of Safavid rule in 1722, it seemed that Iran might disappear altogether, partitioned between her neighbors. Within a few years the country surged back to make a bid for regional dominance under Nader Shah, but lapsed again into civil war after his untimely death in 1747. The civil wars lasted almost until the end of the century, albeit with an interlude of relative calm and good governance under Karim Khan Zand, who ruled from the mid-1750s until his death in 1779. In 1796, after more civil wars, Agha Mohammad Shah had himself crowned as the first

monarch of the Qajar dynasty, which lasted until 1925. This formative period is vital for understanding modern and contemporary Iran, and it is a fascinating drama of events and personalities in its own right. It was a period of crisis and turmoil, but also a period of possibility and creativity in ways that have for the most part been forgotten. Until now, scholarship on the significance of the eighteenth century in Iran has been scant and often obscure. This volume will not only change that, but it will also reshape our understanding of the history of one of the most important and influential states in the Middle East.

Throughout the times of the land we call Round Top, one thought has constantly prevailed. This is a land of opportunity. The land was formed over the centuries into flat land and hills by rivers beyond and by creeks and springs, while waiting for animals and mankind to arrive. This land is located in the northeastern margin of today's Fayette County, and lies on a high hill that looks down toward the south into the bottom lands of a crossing. The struggle

on this small piece of land began with the movement of animals that needed a convenient place for water that was crossable during the seasons. This perfect crossing flows through the south eastern side of the present town of Round Top located between two high hills. This crossing was the home of native American Indians, American settlers and German immigrants.

*The Early Ages* Routledge

First published in 1972, *Philosophical Tasks* was written to identify and examine some central themes in contemporary Anglo-American philosophy. The book explores the claim that philosophy is essentially linguistic, and considers in particular such topics as philosophy and science, fact and language, conceptual analysis, first- and second-order tasks, scepticism, ordinary language, and conceptual frameworks.

**The Discovery of Historicity in German Idealism and Historism** University of Pennsylvania Press

*Traditions & Encounters* offers an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times. Given the diversity of human societies, gathering and organizing the sheer mass of information in a meaningful way is a daunting challenge for any world history survey course. The seven-part chronological organization enables students to understand the development of the world through time, while also exploring broader, big-picture thematic issues in world history. Through new and revised chapter-level and part-level features, the hallmark twin themes of traditions and encounters emerge in greater clarity than ever before in this sixth edition. As a result, students have resources that enable them to move beyond the facts of history and examine the past critically, analyze causes and effects, and recognize similarities and differences across world regions and time periods. By digging deeper into the implications of world history's stories—not just the who, the what, and the where, but also the why and the how—students can make sense of the human past. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.
