BRENDEN CHAIM

English-translated Chinese standards Butterworth-Heinemann

Volume 2 of the Handbook covers the geotechnical procedures used in manufacturing anchors and piles as well as for improving or underpinning foundations, securing existing constructions, controlling ground water, excavating rocks and earth works. It also treats such specialist areas as the use of geotextiles and seeding.

Journal of Geotechnical Engineering Springer

Foundation Engineering in Difficult Ground discusses the different principles and practices involved in the building of foundations in different soil types, especially on difficult ground. The book covers topics such as the classification of soil; silts, loess, and tills; the mechanical behavior of rocks; and the engineering aspects of rock weathering, engineering classification of rock

masses, and the engineering performance of rocks. Also covered in the book are topics such as models for the mechanical behaviour of soil; computer predictions in difficult soil conditions; foundations on rock, settlement foundations, and the relation of earth movement on foundations; ground treatment; and the appraisal of stability conditions in different soil conditions. The text is recommended for engineers who are in need of a guide in the establishment of foundations in different soil conditions, especially those in difficult ones.

EMAIL: COC@CODEOFCHINA.COM "Codeofchina Inc., a part of TransForyou (Beijing) Translation Co., Ltd., is a professional Chinese code translator in China. Now, Codeofchina Inc. is running a professional Chinese code website, www.codeofchina.com. Through this website, Codeofchina Inc. provides English-translated Chinese codes to clients worldwide. About TransForyou TransForyou (Beijing) Translation Co., Ltd.,

established in 2003, is a reliable language service provider for clients at home and abroad. Since our establishment, TransForyou has been aiming to build up a translation brand with our professional dedicated service. Currently, TransForyou is the director of China Association of Engineering Construction Standardization (CECS); the committeeman of Localization Service Committee / Translators Association of China (TAC) and the member of Boya Translation Culture Salon (BTCS); and the field study center of the University of the University of International Business & Economics (UIBE) and Hebei University (HU). In 2016, TransForyou ranked 27th among Asian Language Service Providers by Common Sense Advisory. "

Tower Crane Stability CRC Press

Translated from the second Russian edition of 1988. Parts 2, "Soil mechanics" and 3, "Foundations and footings" are revised and updated versions of the first Russian edition of 1981. Part 1, "Special course in engineering geology," contains a discussion of physicommechanical properties of soil, geody

Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012

Springer-Verlag

This resource covers all areas of interest for the practicing engineer as well as for the student at various levels and educational institutions. It features the work of authors from all over the world who have contributed their expertise and support the globally working engineer in finding a solution for today's mechanical engineering problems. Each subject is discussed in detail and supported by numerous figures and tables.

Construction and Maintenance Springer Science & Business Media

Being the premier forum for the presentation of new advances and research results in the fields of Industrial Engineering, IEEM 2015 aims to provide a high-level international forum for experts, scholars and entrepreneurs at home and abroad to present the recent advances, new techniques and applications face and face, to promote discussion and interaction among academics, researchers and professionals to promote the developments and applications of the related theories and technologies in universities and enterprises, and to establish business or research relations to find global partners for future collaboration in the field of Industrial Engineering. All the goals of the international conference are to fulfill the mission of the series conference which is to review, exchange, summarize and promote the latest achievements in the field of industrial engineering and engineering management over the past year, and to propose prospects and vision for the further development. This volume is the second of the two proceedings volumes from this conference.

Concrete Construction Engineering Handbook Springer Nature
Over 140 experts, 14 countries, and 89 chapters are represented in the second edition of the Bridge Engineering Handbook. This extensive collection highlights bridge engineering specimens from around the world, contains detailed information on bridge engineering, and thoroughly explains the concepts and practical applications surrounding the subject

Construction Technology for Tall Buildings John Wiley & Sons

Tower cranes are a vital element in the construction process. There are around 1500 cranes in the UK and at any time around 1000 are in use. This document is intended to promote the safe design of foundations for, and use of, tower cranes through an improved understanding of temporary works design and health and safety issues.

Springer Handbook of Mechanical Engineering CRC Press

Information engineering and applications is the field of study

concerned with constructing information computing, intelligent systems, mathematical models, numerical solution techniques, and using computers and other electronic devices to analyze and solve natural scientific, social scientific and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying. The Proceedings of the 2nd International Conference on Information Engineering and Applications (IEA 2012), which was held in Chongqing, China, from October 26-28, 2012, discusses the most innovative research and developments including technical challenges and social, legal, political, and economic issues. A forum for engineers and scientists in academia, industry, and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress, and experience in all aspects of information engineering and applications.

Product catalog - China Industry Standard - Building & Construction: JG; JG/T; JGT [Tips: You may ADDITIONALLY write to Sales@ChineseStandard.net for unprotected true-PDF] Springer Science & Business Media

Construction Engineering Calculations and Rules of Thumb begins with a brief, but rigorous, introduction to the mathematics behind the equations that is followed by self-contained chapters concerning applications for all aspects of construction engineering. Design examples with step-by-step solutions, along with a generous amount of tables, schematics, and calculations are provided to facilitate more accurate solutions through all phases of a project, from planning, through construction and completion. Includes easy-to-read and understand tables, schematics, and calculations Presents examples with step-by-step calculations in both US and SI metric units Provides users with an illustrated, easy-to-understand approach to equations and calculation methods

Geotechnical Engineering for the Preservation of Monuments and Historic Sites KHANNA PUBLISHING HOUSE

This volume contains peer-reviewed papers from the Third World Landslide Forum organized by the International Consortium on Landslides (ICL) in June 2014. The complete collection of papers from the Forum is published in three full-color volumes and one mono-color volume.

JG; JG/T; JGT - Product Catalog. Translated English of Chinese Standard. (JG; JG/T; JGT) Copyright Office, Library of Congress

Die zweite überarbeitete und erweiterte Auflage des Bandes Deutsch/Englisch des Wörterbuchs GeoTechnik enthält jetzt etwa 70.000 Eintragungen. Zu jedem Stichwort werden gebräuchliche Synonyme aufgeführt. Zum besseren Verständnis finden sich unter einigen Stichwörtern zusätzliche Erläuterungen. Neben Begriffen aus der allgemeinen Geologie deckt das Wörterbuch insbesondere die eher anwendungsorientierten Themenbereiche der Geowissenschaften ab. Schwerpunktmäßig werden folgende Gebiete behandelt: - Bergbau, - Bodenkunde, - Erdbau, - Hangbewegungen - Erkundungsgeologie, - Fernerkundung, - Geophysik, - Geomorphologie, - Geodäsie, - Umweltgeotechnik - Grundbau, - Hydrogeologie, - Hydrotechnik, - Ingenieurgeologie, - Kartographie, - Fotogrammetrie - Lagerstättenkunde, - Mineralogie, - Ozeanografie, - Vermessungswesen, - Fels- und Tunnelbau, - Deichbau, - Verkehrswegebau. .

Numerical Methods in Geotechnical Engineering(NUMGE 2010)

The development of water resources is a key element in the socio-economic development of many regions in the world. Water availability and rainfall are unequally distributed both in space and time, so dams play a vital role, there being few viable alternatives for storing water. Dams hold a prime place in satisfying the ever-increasing demand for power, irrigation and drinking water, for protection of man, property and environment from catastrophic floods, and for regulating the flow of rivers. Dams have contributed to the development of civilization for over 2,000 years. Worldwide there are some 45,000 large dams listed by ICOLD, which have a height over 15 meters. Today, in western countries, where most of the water resources have been developed, the safety of the existing dams and measures for extending their economical life are of prime concern. In developing countries the focus is on the construction of new dams. The proceedings of the 4th International Conference on Dam Engineering includes contributions from 18 countries, and provides an overview of the state-of-the-art in hydropower development, new type dams, new materials and new technologies, dam and environment. Traditional areas, such as concrete dams and embankment dams, methods of analysis and design of dams, dam foundation, seismic analysis, design and safety, stability of dam and slope, dam safety monitoring and instrumentation, dam maintenance, and rehabilitation and heightening are also considered. The book is of special interest to scientists, researchers, engineers, and students working in dam engineering, dam design, hydropower development, environmental engineering, and structural hydraulics.

Proceedings of the 4th International Conference on Dam Engineering, 18-20 October, Nanjing, China Springer

More than ten years have passed since the first edition was published. During that period there have been a substantial number of changes in geotechnical engineering, especially in the applications of foundation engineering. As the world population increases, more land is needed and many soil deposits previously deemed unsuitable for residential housing or other construction projects are now being used. Such areas include problematic soil regions, mining subsidence areas, and sanitary landfills. To overcome the problems associated with these natural or man-made soil deposits, new and improved methods of analysis, design, and implementation are needed in foundation construction. As society develops and living standards rise, tall buildings, transportation facilities, and industrial complexes are increasingly being built. Because of the heavy design loads and the complicated environments, the traditional design concepts, construction materials, methods, and equipment also need improvement. Further, recent energy and material shortages have caused additional burdens on the engineering profession and brought about the need to seek alternative or cost-saving methods for foundation design and construction.

CRC Press

There is a strong need for a comprehensive textbook on

construction technology for tall buildings, particularly in reference to land scarce countries and cities in Asia. Containing over 200 illustrations, this book describes in detail the latest construction practices and processes for tall buildings from foundation to roof. The construction sequence of the various proprietary systems and their merits and disadvantages are discussed.

Comprehensive references for each topic are also provided.

Currently, students and practitioners in the region dealing with construction technology have to rely on textbooks written mainly in the US and UK, many of which are not relevant or not practical for use in the region because of different geological, climatic, social and economic conditions. This book is written for use as a textbook and reference book by undergraduates as well as practitioners in the fields of architecture, civil engineering, building, quantity surveying, and other related fields. The aim of MSCE 2014 is to provide a platform for researchers, engineers, and academicians, as well as industrial professionals, to present their research results and development activities in mechanism science and control engineering. It provides opportunities for the delegates to exchange new ideas and application experiences, to establish business or research relations and to find global partners for future collaboration.

MSCE2014 is conducted to all the researchers, engineers, industrial professionals and academicians, who are broadly welcomed to present their latest research results, academic developments or theory practice. Topics of interest include but are not limited to Mechanism theory and Application, Mechanical control and Automation Engineering, Mechanical Dynamics, Materials Processing and Control, Instruments and Vibration Control. It is of great pleasure to see the delegates exchanging ideas and establishing sound relationships on the conference.

Proceedings of the 22nd International Conference on Industrial Engineering and Engineering Management 2015 CRC Press

Sustainable Buildings and Structures collects the contributions presented at the 1st International Conference on Sustainable Buildings and Structures (Suzhou, China, 29 October-1 November 2016). The book aims to share thoughts and ideas on sustainable approaches to urban planning, engineering design and construction. The topics discussed include:-
