Building Materials is a
textbook designed for
undergraduate civil
engineering students
who are offered
courses on Building

and Construction Materials. The book primarily covers the AICTE syllabus on Materials, Testing, and Evaluation. It provides detailed and up-to-date information on various building and construction materials, including green materials. The book discusses the usual building materials like stones, bricks, lime, cement, aggregates, mortars, concrete and special concretes, wood, ferrous materials, steel, plastics, non-ferrous materials, glass, ceramic materials, plastics, paints, etc. Wherever necessary, the substitute materials and the greenness of the material are identified and explained. The book provides a thorough discussion of

various materials using appropriate illustrations, real-life photographs, examples, and case studies for better understanding.

Building Material and Construction (WBSCTE)

Building Material and Construction (WBSCTE)

This book studies the correlation between technological knowledge and industrial performance, with the focus on electricity, an emerging technology during 1880 and 1945.

Floods, from Defence to Management

Cambridge University Press

Whatever has been written about Dr. Syama Prasad Mookerjee so far doesn't do justice to his grand and multi-

faceted personality. This leading sentiment is behind the motivation of writing the present book. A lot has been written on Dr. Mookerjee's political endeavours. However, his persona is immeasurably significant beyond his political life. The simplest explanation of his life proclaims him master of social, educational and economic thought. This book is an attempt to know how Dr. Mookerjee became a powerful personality, an educationist, a thinker, and an administrator. The focal point is to explore the new experiments and innovations brought out into the world of education by him. He always saw the role of education as of utmost importance in

the process of national regeneration. Throughout his life, he spoke in favour of education, teachers and students. He was an educationist par excellence. It was under his tenure that Gurudev Rabindranath Tagore delivered the convocation address in Bengali, which was not less than a revolution in British India. This book will help the readers see the profound blending of tolerance, humanity, and tradition, together with the scientific outlook in the personality of Dr. Syama Prasad Mookerjee. Dr. Syama Prasad Mookerjee The Great Educationist by Dr. Nand Kishore Garg and Namarta Sharma: This biography sheds light on the life and contributions of Dr.

Syama Prasad Mookerjee, a prominent political figure and educationist. The book explores his vision for education, his role in shaping India's educational policies, and his enduring impact on the nation's educational landscape.

Key Aspects of the Book "Dr. Syama Prasad Mookerjee The Great Educationist":

Educational Visionary: The book highlights Dr. Mookerjee's visionary ideas and initiatives in the field of education, emphasizing their relevance today.

Political Legacy: It provides insights into his multifaceted contributions to Indian politics and nation-building.

Educational Reform: "Dr. Syama Prasad Mookerjee The Great Educationist"

explores the educational reforms championed by Dr. Mookerjee and their lasting influence. Dr. Nand Kishore Garg and Namarta Sharma are authors and scholars dedicated to preserving and sharing the life stories of significant historical figures.

The Calcutta Review

Prabhat Prakashan

Strength of Materials is an important subject in engineering in which concept of load transfer in a structure is developed and method of finding internal forces in the members of the structure is taught. The subject is developed systematically, using good number of figures and lucid language. At the end of each chapter a set of problems are

presented with answer so that the students can check their ability to solve problems. To enhance the ability of students to answer semester and examinations a set of descriptive type, fill in the blanks type, identifying true/ false type and multiple choice questions are also presented. KEY FEATURES • 100% coverage of new syllabus • Emphasis on practice of numerical for guaranteed success in exams • Lucidity and simplicity maintained throughout • Nationally acclaimed author of over 40 books

Commission (SSC) is one of the prestigious organisations of Government of India known widely for recruiting potential candidates for various posts at various subordinate offices.

“SSC Junior Engineer CPWD/MES Civil Engineering” for Paper I Computer-based test

(CBT) 2019 is a revised edition to provide students an updated version of study material following the latest examination pattern for this examination. It is divided into three parts covering General Intelligence and Reasoning, General Awareness, and Civil along with their chapters equipped with complete theories. Each chapter consists of sufficient number of MCQs for harnessing the conceptual clarity. It has 3 solved papers of 2015, 2017 and 2018 with detailed solutions. It also provides mock test for self-practice. Enclosed with such effective set of study material, it is hoped that it will ensure success in this upcoming examination.

Building Technology involves selecting suitable materials and carrying out building construction neatly. This book comprehensively covers all aspects of the subject and is written as per the requirements of civil engineering diploma students of West Bengal. The text is presented in simple, precise and reader-friendly language. It is amply supported by figures and tables. KEY FEATURES □ Detailed coverage of Kerala

University syllabus □
 Simple and precise
 explanations □ Text
 sufficiently illustrated
 by figures and tables □

Relevant IS Codes
 listed □ Exhaustive
 questions given

In the past decade,
 Bangladesh has
 achieved significant
 social and economic
 progress. Despite high
 population density, a
 limited natural-

resource base,
 underdeveloped
 infrastructure, frequent
 natural disasters and
 political uncertainty,
 the country has
 recorded positive
 developments in terms
 of broad economic and
 social indicators. This
 Handbook presents a
 comprehensive and
 interdisciplinary
 resource on the
 politics, society and
 economy of
 Bangladesh today.

Divided into six
 thematic sections, the
 Handbook focuses on
 relevant issues and
 trends on: History and
 the making of
 contemporary
 Bangladesh Politics
 and institutions
 Economy and
 development Energy
 and environment State,
 society and rights
 Security and external
 relations Written by a

team of international experts in the field, the chapters provide an accessible and up-to-date insight into contemporary Bangladesh. The Handbook will be of interest to students and academics of South Asian studies, as well as policymakers, journalists and others who wish to learn more about this increasingly important country.

This text on building materials includes discussion of structural clay products, rocks and stones, wood, materials for making concrete, ferrous and non-ferrous metals, and miscellaneous materials.

The Times of India Directory and Year Book Including Who's who Springer

Social and economic history of science and technology has emerged as a major theme of interdisciplinary research in South Asian history since the late 1990s. This book studies the correlation between technological knowledge and industrial performance,

with the focus on electricity, an emerging technology during 1880 and 1945. The arrival of electricity necessitated the introduction of new institutional facilities, and with the growth of technological system, a new business culture grew - there was demand for trained manpower to handle machines and better educational facilities. Taking a broad view of the subject, the narrative of this book is built around the historical experiences of the local Bengali-speaking population. Adopting the social constructionist model, *Let There Be Light* presents an amalgamation of archival and Indian language source materials to delineate the diverse nature of

the appropriation of technological ideas into Indian culture. *SSC Junior Engineers Civil Engineering Paper 1* Springer

Comprehensive reference covering the design of foundations for offshore wind turbines As the demand for “green” energy increases the offshore wind power industry is expanding at a rapid pace around the world. Design of Foundations for Offshore Wind Turbines is a comprehensive reference which covers the design of foundations for offshore wind turbines, and includes examples and case studies. It provides an overview

of a wind farm and a wind turbine structure, and examines the different types of loads on the offshore wind turbine structure. Foundation design considerations and the necessary calculations are also covered. The geotechnical site investigation and soil behavior/soil structure interaction are discussed, and the final chapter takes a case study of a wind turbine and demonstrates how to carry out step by step calculations. Key features: New, important subject to the industry. Includes calculations and case studies. Accompanied by a website hosting software and data files. Design of Foundations for Offshore Wind Turbines is a must have reference for engineers within the

renewable energy industry and is also a

useful guide for graduate students in this area.
