Hunters, Farmers, and the
Shaping of the World
Cambridge University
Press
Originating from a series
of workshops held at the
Alaska Forum of the
Fourth International Polar

Year, this interdisciplinary
volume addresses a host
of current concerns
regarding the ecology and
rapid transformation of
the arctic. Concentrating
on the most important
linked social-ecological
systems, including fresh
water, marine resources,
and oil and gas
development, this volume
explores opportunities for

sustainable development
from a variety of
perspectives, among
them social sciences,
natural and applied
sciences, and the arts.
Individual chapters
highlight expressions of
climate change in dance,
music, and film, as well as
from an indigenous
knowledge-based
perspective.

Selected Writings of Robert R. Janes

University of Alaska Press
This book describes the work of the North Pacific Marine Science

Organization (PICES) since its launch 1992. Mapping the evolution of its agenda gives insight into the development of modern marine science in the context of competing demands of stakeholders within and outside the organization. The opening chapter consider the challenges of marine science as a large scale, and places PICES in the

contexts of internationalism and science-based resource management. They also lay out the organization's longstanding focus on the development of climate science and its applications. Subsequent chapters explore the pros and cons of national vs. international science, negotiating the nature of investigation and cooperation across scientific, political and institutional boundaries in the region; national perspectives on purpose, scope, and mandates;

assessing two major initiatives undertaken to date; the challenges of incorporating social science into an organization of mainly natural scientists.
Proceedings of the 2017 conference for YOUNg MARine REsearchers in Kiel, Germany The Canadian Encyclopedia
An analysis of health care among Indians in the central subarctic of Canada, principally Ontario and Manitoba. Based on an analysis of the interrelationships between health status,

medical care, and social change, proposes a broad strategy for improving the health of native peoples in Canada.

Dwelling in Political

Landscapes Routledge Monthly. Papers presented at recent meeting held all over the world by scientific, technical, engineering and medical groups. Sources are meeting programs and abstract publications, as well as questionnaires. Arranged under 17 subject sections, 7 of direct interest to the life scientist. Full programs of

meetings listed under sections. Entry gives citation number, paper title, name, mailing address, and any ordering number assigned.

Quarterly and annual indexes to subjects, authors, and programs (not available in monthly issues).

A Guide to Training and Development Tools. 8th Edition Bloomington : Indiana University Press
Indigenous Water and Drought Management in a Changing World presents a series of global case studies that examine how

different Indigenous groups are dealing with various water management challenges and finding creative and culturally specific ways of developing solutions to these challenges. With contributions from Indigenous and non-Indigenous academics, scientists, and water management experts, this volume provides an overview of key water management challenges specific to Indigenous peoples, proposes possible policy solutions both at the international

and national levels, and outlines culturally relevant tools for assessing vulnerability and building capacity. In recent decades, global climate change (particularly drought) has brought about additional water management challenges, especially in drought-prone regions where increasing average temperatures and diminishing precipitation are leading to water crises. Because their livelihoods are often dependent on the land and water, Indigenous

groups native to those regions have direct insights into the localized impacts of global environmental change, and are increasingly developing their own adaptation and mitigation strategies and solutions based on local Indigenous knowledge (IK). Many Indigenous groups around the globe are also faced with mounting pressure from extractive industries like mining and forestry, which further threaten their water resources. The various cases presented in Indigenous Water and

Drought Management in a Changing World provide much-needed insights into the particular issues faced by Indigenous peoples in preserving their water resources, as well as actionable information that can inform future scientific research and policymaking aimed at developing more integrated, region-specific, and culturally relevant solutions to these critical challenges. Includes diverse case studies from around the world Provides cutting-edge perspectives about

Indigenous peoples' water management issues and IK-based solutions
Presents maps for most case studies along with a summary box to conclude each chapter
The Role of Constructed Wetlands and Other Alternative Technologies in Meeting the Wastewater Treatment Needs of Rural and Small Communities Routledge Monthly. Bibliography of MEDLARS-based journal articles that describe perturbations in the ecosystems important to health. For the most part,

genetic and clinical literature not included. Index medicus format; author, subject sections. *Skill Building for Labor-management Groups* princeton alumni weekly
People all over the globe are experiencing unprecedented and often hazardous situations as environments change at speeds never before experienced. This edited collection proposes that anthropological perspectives on landscape have great potential to address the resulting conundrums. The

contributions build on broadly phenomenological, structuralist and multi-species approaches to environmental perception and experience, but they also argue for incorporating political power into analysis alongside dwelling, cosmology and everyday practice. The book's 13 ethnographically rich chapters explore how the material and the conceptual are entangled in and as landscapes, but it also looks at how these processes unfold at many

scales in time and space, involving different actors with different powers. Thus it reaches towards new methodologies and new ways of using anthropology to engage with the sense of crisis concerning environment, movements of people, climate change and other planetary transformations. Dwelling in political landscapes: contemporary anthropological perspectives builds substantially upon anthropological work by Tim Ingold, Anna Tsing

and Philippe Descola and on related work beyond, which emphasises the ongoing and open-ended, yet historically conditioned ways in which humans and nonhumans produce the environments they inhabit. In such work, landscapes are understood as the medium and outcome of meaningful life activities, where humans, like other animals, dwell. This means that landscapes are neither social/cultural nor natural, but socio-natural. Protesting against and moving on from the

proverbial dualisms of modern, Western and maybe capitalist thought, is only the first step in renewing anthropology's methodology for the current epoch, however. The contributions ask how seemingly disconnected temporal, representational, economic and other systemic dynamics fold back on lived experience that are materialised in landscapes. Foremost through studying how socially valued landscapes become irreversibly disturbed, commodified or

subjected to wilful markings or erasures, the book explores a number of approaches to how landscapes are entangled in the ways people gather and organise themselves. Mindful of troubling changes in Earth Systems, all the authors argue from empirics. They show that processes of landscape change are always both habitual and laden with choices. That is, landscape change is political. Undoubtedly, landscape politics is bound up not just in how nature has been

imagined, but in long histories of consumption. Today, an alarming quest for raw materials and energy continues to change both political and geological formations. Meanwhile dominant socio-political aspirations mean the exploitation of staggering volumes of cheap resources like fossil fuels in order to sustain economic processes that are as taken-for-granted as they are unsustainable. Like anthropology generally, this book attends to the contextual details buried in such

planet-scale pictures. Building on traditional anthropological strengths, many authors consider the details of how the past is brought into the present – or erased from it – in material flows and sensory awareness, as well as in narratives that are explicitly linked to particular landscapes. Colonial identity formation and the different ways that it links with how landscape is viewed and managed (for instance for resource development for a global market), whether in Southern Africa,

Israel/Palestine, the Canadian arctic or Indonesia, is a particularly striking example of how to talk about landscape is also to talk about past, present and future. And as the idea that we inhabit the Anthropocene becomes commonplace, the discipline can meaningfully discuss the current era as one of disavowed ruins as well as of poorly understood multispecies relations. To think of landscape as historically produced across multiple scales, does not mean ignoring

its sensuous qualities let alone its role in cosmological systems. On the contrary, the analyses in the collection attend to the ways people's movements through the landscape produce it as a material and conceptual resource. Taken together, the book's ethnographic analyses take on board the unprecedented conditions under which people everywhere are having to make sense and forge relationships to the worlds they inhabit. Since landscapes are not what they used to be, neither

can anthropology be. Leadership Resources

Museums throughout the world are under increasing pressure in the wake of the 2008/2009 economic recession and the many pressing social and environmental issues that are assuming priority. The major focus of concern in the global museum community is the sustainability of museums in light of these pressures, not to mention falling attendance and the challenges of the digital world. Museums and the

Paradox of Change provides a detailed account of how a major Canadian museum suffered a 40 percent loss in its operating budget and went on to become the most financially self-sufficient of the ten largest museums in Canada. This book is the most detailed case study of its kind and is indispensable for students and practitioners alike. It is also the most incisive published account of organizational change within a museum, in part because it is honest, open

and reflexive. Janes is the first to bring perspectives drawn from complexity science into the discussion of organizational change in museums and he introduces the key concepts of complexity, uncertainty, nonlinearity, emergence, chaos and paradox. This revised and expanded third edition also includes new writing on strengthening museum management, as well as reflections on new opportunities and hazards for museums. It concludes with six ethical

responsibilities for museum leaders and managers to consider. Janes provides pragmatic solutions grounded in a theoretical context, and highlights important issues in the management of museums that cannot be ignored.

The Other Side of Eden
O'Reilly Media

Developers often struggle when first encountering the cloud. Learning about distributed systems, becoming familiar with technologies such as containers and functions, and knowing how to put

everything together can be daunting. With this practical guide, you'll get up to speed on patterns for building cloud native applications and best practices for common tasks such as messaging, eventing, and DevOps. Authors Boris Scholl, Trent Swanson, and Peter Jausovec describe the architectural building blocks for a modern cloud native application. You'll learn how to use microservices, containers, serverless computing, storage types, portability, and functions. You'll also

explore the fundamentals of cloud native applications, including how to design, develop, and operate them. Explore the technologies you need to design a cloud native application Distinguish between containers and functions, and learn when to use them Architect applications for data-related requirements Learn DevOps fundamentals and practices for developing, testing, and operating your applications Use tips, techniques, and best

practices for building and managing cloud native applications Understand the costs and trade-offs necessary to make an application portable

Building Smart Teams is an essential guide to creating a smart team fast. Based on research results from close to 2,000 individuals organized in more than 250 teams, Building

Smart Teams identifies the three critical skill sets that teams need and shows how to transfer these skills to a group. The authors' research and experience shows that, by concentrating on these three critical skills sets, a group is almost certain to quickly become a high performing team. High-functioning teams are increasingly important to organizational success, but just throwing a team together will not give the desired results. Building Smart Teams gives you the theory and rationale

behind high performance teams, but, in addition, it is packed with exercises, diagnostic tools, tips, and techniques to use with groups. The exercises are time-tested with the more than 100 groups trained by the authors. The approach is not to dictate the one best way for teams to behave, but, rather, to help team members build skills and implement processes to increase success. Within this model, there is ample room for teams to discover their own unique culture, performance

strategies, and paths to success.

A rich and sophisticated ethnography of a stateless indigenous society and its complex and troubling relations with its natural environment and the Soviet state that dominated it.

The Social Life of the State in Subarctic Siberia

Houghton Mifflin School

This guide provides over 300 pages of resources suggested by leadership educators in surveys,

Center for Creative Leadership staff, and search of library resources. This eighth edition is half-new, including web sites and listserv discussion groups, and it places a stronger focus on meeting the needs of human resources professionals and corporate trainers. An annotated bibliography groups leadership materials in several broad categories: overview; in context; history, biography and literature; competencies; research, theories, and models;

training and development; social, global, and diversity issues; team leadership; and organizational leadership (180 pages). Includes annotated lists of: journals and newsletters (9 pages); instruments (21 pages); exercises (41 pages); instrument and exercise vendors (5 pages); videos (29 pages); video distributors (4 pages); web sites (6 pages); organizations (21 pages); and conferences (9 pages). (Contains a 66-page index of all resources.) (TEJ)

Macmillan

This is the fifth & most comprehensive in a series of source books on leadership education for leaders in government, education, human services & business. It aims to help them stay up to date on the courses, programs & resources available on leadership education. THE SOURCE BOOK contains the following sections: NEW COURSES & PROGRAMS including 93 detailed entries on leadership majors & minors, courses & programs on college &

university campuses & for nonprofit & community leadership & a cumulative list of courses & programs from 1986 to 1992; LEADERSHIP DEVELOPMENT TOOLS including instruments, exercises, simulations & games; LEADERSHIP BIBLIOGRAPHY containing annotated entries on almost 1000 books & articles; FILMS & VIDEOS describing more than 130 films & videos with runtime, format & distributors; RESOURCE PERSONS DIRECTORY

containing information on 300 people who conduct research & practice in the field of leadership; RESOURCE ORGANIZATIONS DIRECTORY listing over 80 organizations with an interest in leadership education; CONFERENCE & MEETING DIRECTORY featuring information on 13 annual events on leadership education; & INDEX which includes both name & subject entries for the information included in the book.
Museums without Borders Springer

This edition of "The Canadian Encyclopedia is the largest, most comprehensive book ever published in Canada for the general reader. It is COMPLETE: every aspect of Canada, from its rock formations to its rock bands, is represented here. It is UNABRIDGED: all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume. It has been EXPANDED: since 1988 teams of researchers have been diligently fleshing out old entries

and recording new ones; as a result, the text from 1988 has grown by 50% to over 4,000,000 words. It has been UPDATED: the researchers and contributors worked hard to make the information as current as possible. Other words apply to this extraordinary work of scholarship: AUTHORITATIVE, RELIABLE and READABLE. Every entry is compiled by an expert. Equally important, every entry is written for a Canadian reader, from the Canadian point of view. The finished

work - many years in the making, and the equivalent of forty average-sized books - is an extraordinary storehouse of information about our country. This book deserves pride of place on the bookshelf in every Canadian Home. It is no accident that the cover of this book is based on the Canadian flag. For the proud truth is that this volume represents a great national achievement. From its formal inception in 1979, this encyclopedia has always represented a

vote of faith in Canada; in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated. At the start of a new century and a new millennium, in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations, this "Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future. The statistics behind this volume are staggering. The opening

sixty pages list the 250 Consultants, the roughly 4,000 Contributors (all experts in the field they describe) and the scores of researchers, editors, typesetters, proofreaders and others who contributed their skills to this massive project. The 2,640 pages incorporate over 10,000 articles and over 4,000,000 words, making it the largest - some might say the greatest - Canadian book ever published. There are, of course, many special features. These include a map of Canada, a special

page comparing the key statistics of the 23 major Canadian cities, maps of our cities, a variety of tables and photographs, and finely detailed illustrations of our wildlife, not to mention the colourful, informative endpapers. But above all the book is "encyclopedic" - which the "Canadian Oxford Dictionary describes as "embracing all branches of learning." This means that (with rare exceptions) there is satisfaction for the reader who seeks information on any Canadian subject.

From the first entry "A mari usque ad mare - "from sea to sea" (which is Canada's motto, and a good description of this volume's range) to the "Zouaves (who mustered in Quebec to fight for the beleaguered Papacy) there is the required summary of information, clearly and accurately presented. For the browser the constant variety of entries and the lure of regular cross-references will provide hours of fascination. The word "encyclopedia" derives from Greek

expressions alluding to a grand "circle of knowledge." Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known. Yet now Canada's finest scientists, academics and specialists have distilled their knowledge of our country between the covers of one volume. The result is a book for every Canadian who values learning, and values Canada.
Ecologie Des Régions Subarctiques Suomalaisen Kirjallisuuden Seura

A guide to reliable sources and studies.

A Roadmap to High Performance Building Smart Teams A Roadmap to High Performance Provides the first quantitative overview of global source-to-sink fluxes in cold climate environments for graduate students and researchers.

Monthly Catalog of United States Government Publications Springer Drawing together nearly 40 years of experience, Museums without Borders

presents the key works of one of the most respected practitioners and scholars in the field. Through these selected writings, Robert R. Janes demonstrates that museums have a broader role to play in society than is conventionally assumed. He approaches the fundamental questions of why museums exist and what they mean in terms of identity, community, and the future of civil life. This book consists of four Parts: Indigenous Peoples; Managing Change; Social Responsibility, and

Activism and Ethics. The Parts are ordered chronologically and each begins with an introduction and an overview of the ensuing articles which situates the papers in their historical and cultural contexts. Using an interdisciplinary approach that combines anthropology, ethnography, museum studies and management theory, Janes both questions and supports mainstream museum practice in a constructive and self-reflective manner, offering readers

alternative viewpoints on important issues. Considering concepts not generally recognized in museum practice, such as the Roman leadership model of *primus inter pares* and the Buddhist concept of mindfulness, Janes argues that the global museum community must examine how they can meet the needs of the planet and its inhabitants. Museums without Borders? charts the evolving role of the contemporary museum in the face of environmental, societal and ethical

challenges, and explores issues that have, and will, continue to shape the museum sector for decades to come. This book demonstrates that it is both reasonable and essential to expand the purpose of museums at this point in history – not only because of their unique characteristics and value to society, but also because of Janes' respect and admiration for their rich legacy. It is time that museums assist in the creation of a new, caring, and more conscious future for themselves and

their communities. This can only be done through authentic engagement with contemporary issues and aspirations.
