CIBSE - Building Services Topics This volume, is part of "CIBSE Guide B: Heating, Ventilating, Air Conditioning and Refrigeration", providing guidance on the practical design of heating, ventilation and air

conditioning (HVAC) systems. The guide, released by the Chartered Institution of Building Services Engineers (CIBSE), was published in five separate chapters. CIBSE Guide B1: Heating | Build Up The Chartered Institution of Building Services Engineers (CIBSE; pronounced 'sib-see') is an international professional engineering association based in London that represents building services engineers, also commonly known as Mechanical and electrical engineers, Architectural engineers, Technical building services engineers, Building engineers, or Facilities and services planning engineers. Chartered Institution of Building Services Engineers ... This volume, is part of "CIBSE Guide B: Heating, Ventilating, Air Conditioning and Refrigeration", providing guidance on the practical design of heating, ventilation and air conditioning (HVAC) systems. The guide, released by the Chartered Institution of Building Services Engineers (CIBSE), was published in five separate chapters. CIBSE -

Chartered Institution of Building Services ... The Guides can be freely downloaded by CIBSE members or ordered as a hard copy. PDF or hard copy versions can also be purchased by non-members. Guide A: Environmental Design; Guide B: Heating, Ventilating, Air Conditioning and Refrigeration; Guide C: Reference Data; Guide D: Transportation Systems in Buildings; Guide E: Fire Safety Engineering CIBSE Technical Publications | CIBSE HK Branch For new buildings, the guide provides a matrix to assist in the selection of heating systems that are likely to operate at an appropriate SPF. This uses a combination of room heat loss, heating emitter types and heating flow temperatures to assess the likely SPF for air (and ground) source heat pumps. Module 36: Air source heat pumps - CIBSE Journal The 5 separate parts for CIBSE Guide B (B1, B2, B3, B4 and B5) produced in 2001 and 2002 were amalgamated into one complete document in 2004, with minor editing to correct errors and to remove duplication, some sections, tables, equations and figures

have been renumbered for consistency. Publisher Information GUI B Heating, ventilating, air conditioning and refrigeration According to CIBSE Guide B - HVAC / 2005, clause 3.3.2, the duct air velocity is not a major factor in the constructional specifications of the ductwork. On the other hand the velocity of air flowing through a duct can be critical, particularly where it is necessary to limit noise levels and has a major impact on the pressure drop.

Guide B provides guidance on the practical design of heating, ventilation and air conditioning systems. It represents a consensus on what constitutes relevant good practice guidance. This has developed over more than 70 years, with the Steering Groups for each edition of the Guide expanding and pruning the content to reflect the evolution of technology and priorities.
