The Mayan Calendar And The Transformation Of Consciousness

Downloaded from inspiringabstinence.com by guest

QUENTIN HAILEY

2011 Mayan Calendar Simon and Schuster

Does the end of the Mayan Calendar start the countdown to Judgment Day? Biblical and historical researcher David Montaigne concludes that this is the case. He says that the end of the Mayan Long Count is the official start of the Bible's seven-year tribulation-both were focused on the same astronomical events that occur from 2012 to 2019. The world as we know it will be gone by 2020. Texts from ancient India tell us about great cycles of destruction. The Egyptians told the same basic story with different names. The Maya reveal another version of the story, and were very clear about the timing of events from December 2012 to 2019. Your average American is no expert on these cultures, but most people do have a Bible at home-and the clearest details on what is about to happen can be found in the Bible, if you don't let someone else tell you which parts you should focus on. No, this isn't what you were taught in Sunday school. Religious leaders guide us between the raindrops of curious comments in the Bible. We are discouraged from focusing on the parts they say we weren't meant to understand. But if we stop glossing over these important passages we will understand a flood of details about the End Times. Our "leaders" are not ignorant of these events. The elite already know what is about to happen and they have made preparations most rational people would not believe, because evidence is suppressed to avoid chaos. They want us to remain ignorant, or at least to believe that the details are secrets that cannot be known. But the coming events (and their timing) are not secrets. Years ago, this book's publication would not have been tolerated by those in power. But by now it doesn't matter much-their plans are not going to be interfered with at this point. Your plans, however, can still be formulated, if you make the choice to understand. Topics include: Bible Prophecy; Matthew 24:36- Knowing the hour and the day; The Mayan Calendar and Mythology; Pole Shifts; Galactic Superwaves; Ancient Egypt; Ancient India; World Mythology; The Georgia Guidestones; The real Star of Bethlehem and the exact birthday of Christ; Calculating the Second Coming, and Judgment Day; more.

Twilight of the Gods Createspace Independent Pub

These four discourses in 2012 are just that, formal conversations. They are related to the Mayan Calendar's end of a very important time group. There have been many books, websites, and organizations formed around the Mayan Calendar and the Mayans themselves. The contemporary groups of indigenous people of Central America who are generally considered to be decedents of the ancient Mayans are the constant study of individuals and organizations ranging from serious academics to interloping practitioners of Mayan life and Mayan spirituality. These discourses are a very different vision of the Mayan Calendar's end of time. Professor bell suggests a unique action that 2012 presents to you. Eschewing the usual apocalyptic predictions, the discourses offer a genuine gift from America's indigenous visionaries.

12: A Novel About the End of the Mayan Calendar SCB Distributors

On the Mayan Calendar, every day of the year represents the energy of one of the twenty solar glyphs and one of the thirteen numbers, called tones. The solar glyph indicates your soul purpose, and the tone is the energy you will use to attain this purpose.

Mysteries of the Mayan Calendar Tate Publishing

The Mayan calendar was one that calculated the end of the world. It once brought historians, philosophers and thinkers fear of the coming doom. In this book, however, we are going to look at the topic objectively. We are not going to focus on the prophecies. We are only going to appreciate the fact that the Mayans were very advanced of their time. Read history books today!

The Mayan and Other Ancient Calendars DeepSix Publishers

The Maya calendar started on August 11, 3114 BCE (corresponding date in the proleptic Gregorian

calendar) and will end on December 21 2012. Will it be Armageddon or just another day? The believers are making survival preparations and turning to religious leaders for guidance and solace. Follow National Geographic through the maze of doomsday prophets, cult leaders, and international and historic end times teachings to understand the science behind the Maya calendar and the phenomenon of Armageddon predictions. Scientists and historians know that end-of-days thinking has occurred throughout time around the world. Norse mythology predicted the world would be submerged in water; ancient Greeks believed that Zeus's defeat by his son would be the grand finale. In A.D. 79, Romans thought Mount Vesuvius's eruption in Pompeii was the start of the apocalypse. Jewish, Christian, and Islamic texts all include some writing about end times. The year 1666—feared by many Christians—proved itself to be the year of the Beast when the Great Fire of London visited God's wrath (as widely believed) on the British. Hailey's Comet drove Europeans and Americans into apocalyptic fits in 1910. Individual charismatic figures have led thousands in unfulfilled Armageddon watches. For example, in 1843, spiritual leader William Miller's doomsday prediction failed (The Great Disappointment), but led followers to establish the Seventh Day Adventists. The Jehovah's Witnesses awaited the world's end in 1914. Preacher Jim Jones led hundreds of cult members to commit suicide in Ghana in the 1970s. Pat Robertson was certain Jesus was returning for the Rapture in the 1980s. The leader of the cult Heaven's Gate convinced 39 followers to commit suicide to escape imminent destruction in 1997. And there's no sign of a slow down. In fact, the Internet has spawned a plethora of doomsday cult leaders, from Y2K hysterics to the most recent religious figure Harold Camping, whose rapture predictions of 2011 left his followers earth-bound. National Geographic debunks the myth and illuminates the fascinating realities of the Maya calendar, the 2012 phenomenon, and Armageddon prophecies through the ages.

The 8 Calendars of the Maya Trafford Publishing

The Book of Revelation tells of angels who fall from their heavenly estates. The Mayan calendar foretells the fall to some two hundred thousand years ago. The discord that followed sent repercussions to earth, arriving about nine thousand years ago when the first generation of the human race Israel emerged. By 4500 BC, an Agenda of a Snake from the fallen angels began to breed the biblical lines of Cain and Seth. Soon, the third generation emerged, and the conditions man calls good and evil began proliferating on the earth. Man's spirit commenced through the spirit of the angel Michael, but today it remains trapped within the human mind. Six thousand years ago, the angels Michael, Ra, Viracocha, and Ra Agenda came to earth to free man's spirit by attempting to prevent the creation of the human race. Unsuccessful, they left earth, bequeathing the Mayan calendar, which contains information about the five Ages, to the Mayan people. The Ra Agenda reemerged by 1948 as the mysterious UFO that defied the laws of reality. They have come to secretly assist mankind through the approaching shift in human consciousness scheduled to occur in the fifth Mayan Age of Aquarius in the year 2040.

In the modern world we are told that time is precious. We are told not to waste our time; and we are even offered classes in how to manage our time. Millions of people are caught in the worship of this thing called time. If time is so important, perhaps it is something we should know more about. During my research on the Mayan calendar I have become aware of many bits of interesting knowledge. I feel that one of the most profound bits, is that time as a viable thing, does not exist. What I have come to understand is that time as the modern world perceives it, is an arbitrary creation of industry. The industrialists have taken a period of light and darkness (called a day) and broken it up into little pieces for their own convenience and management. They keep it in a straight line from beginning to end and hang stuff from it in an attempt to keep things orderly. The industrialized world is entirely based on the counting of seconds, minutes, and hours related to increasing production, consumption, benefit, and profit there from. I have come to find this concept called time to be very cold, insensitive, and unnatural. In the world of the Maya, time would be the energy of existence and it is measured by the cycle of light to dark and back to light, to begin again. This cycle is called KIN. It could be considered the equivalent of the modern day as far as time is concerned, but to the Maya it is considered sacred. It is during KIN that plants grow and provide food; the rains fall and rivers run; babies are born and people live and die. It is the recording of KIN and multiples thereof that is found in the calendars. By studying the changing patterns of KIN connected to the movement of light in their universe the Maya priests became the masters of their world. The ancient Maya understood that KIN was the primary cycle of life and that the cosmos and this Earth within it move in cycles that are flexible and infinite in their repetition. They created their calendars to track these cycles, plan their daily activities, record their history, and consider events of the future. Even today, the elders that maintain the Maya culture are called Day Keepers.

The Mayan Calendar and the Transformation of Consciousness Simon and Schuster

Mayan Calendar Prophecies Speedy Publishing LLC

Crocodile Goes Out is a delightfully illustrated tale of the Day Lords of the Mayan Calendar that captures both the wit and wisdom of this ancient people. Written in English and Spanish, with Mayan glyphs, Crocodile Goes Out is a wonderful way to introduce children to the fascinating world of the Maya while honing their English and Spanish reading skills. Crocodile Goes Out brings the Day Lords who circle the sacred calendar of the Maya to life. Page by page, as the story unfolds, readers learn the English, Spanish and Maya names of these deities and gain insight into their vital role in the everyday life of the Maya. The twenty Day Lord glyphs of the Tzolkin calendar always follow the same cyclical order. The story in this book was created as a device for remembering the twenty glyphs of the Mayan Calendar in proper order. Unlike Christian rectangular calendars, the calendars of the Maya are circular in design, without defined beginning or end. Scholars currently start the cycle with Crocodile and end it with Sun as has been done in this book. Because the World of the Maya spreads over vast areas, it is continuously influencing and being influenced by other cultures with differing languages and artistic traditions. Thus, Day Lord names and symbols used to depict them vary by region and when the symbols were carved, painted or embroidered. This book endeavors to remain true to the style of the ancient glyphs while creating images that effectively convey their sacred meaning.

The only small, popular book on the important subject of ancient calendars. The study of heavenly cycles is common to most ancient cultures. The ancient Egyptians, Chinese, and Babylonians all tried to make sense of the year. But it fell to the later Mesoamerican Maya to create a series of calendars that could be cross referenced. In doing so, the Maya discovered many strange numerical harmonics. Their lunar calendar was extremely accurate-far more so than the Greek Metonic cycle; they tracked Venus to an accuracy of less than a day in five hundred years and their tables could have been used to predict eclipses seven hundred years in the future. This book will provide a much needed compact guide to the Mayan calendar systems as well as covering the essentials of calendar development throughout the world.

Mayan Calendar Systems Simon and Schuster

A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

The Mayan Calendar Smashes to the Ground Benchmark Education Company

Looks at the culture of the Maya and the theories surrounding the end of their calendar in 2012.

Mysteries of the Mayan Calendar Llewellyn Worldwide Limited

Reveals the Mayan calendar to be a spiritual device that describes the evolution of human consciousness from ancient times into the future • Shows the connection between cosmic evolution and actual human history • Provides a new science of time that explains why time not only seems to be speeding up in the modern world but is actually getting faster • Explains how the end of the Mayan calendar is not the end of the world, but a path toward enlightenment The prophetic Mayan calendar is not keyed to the movement of planetary bodies. Instead, it functions as a metaphysical map of the evolution of consciousness and records how spiritual time flows--providing a new science of time. The calendar is associated with nine creation cycles, which represent nine levels of consciousness or Underworlds on the Mayan cosmic pyramid. Through empirical research Calleman shows how this pyramidal structure of the development of consciousness can explain things as disparate as the common origin of world religions and the modern complaint that time seems to be moving faster. Time, in fact, is speeding up as we transition from the materialist Planetary Underworld of time that governs us today to a new and higher frequency of consciousness--the Galactic Underworld--in preparation for the final Universal level of conscious enlightenment. Calleman reveals how the Mayan calendar is a spiritual device that enables a greater understanding of the nature of conscious evolution throughout human history and the concrete steps we can take to align ourselves with this growth toward enlightenment.

UFO Light Technology Publishing

When will the world end? According to the ancient Mayans on 22 December 2012 - will this be an apocalypse or a new beginning? Disaster or awakening? This thought-provoking book explores the accuracy of the Mayan calendar, decodes the hidden meaning in ancient texts, tombs and glyphs and reveals the full meaning of the Mayan prophecy for us all.
