Autocar Plunkett Research, Ltd.

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 2011-2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

The Only Comprehensive Guide to Automotive Companies and Trends Penguin Hardcover

Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iry and the Editors of the Automobile Protection Association, pull no punches.

Plunkett's Automobile Industry Almanac 2009 Plunkett's Automobile Industry Almanac 2009 The Only Comprehensive Guide to Automotive Companies and Trends

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches.

He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12

Subaru Legacy (10-16) & Forester (09-16) Tata McGraw-Hill Education

A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

The Only Comprehensive Guide to Automotive Companies and Trends Dundurn

East Asia is a powerhouse of automobile production. Yet, across the region, national automobile industries have had strikingly different patterns of development. Despite starting from equally low levels of performance and initially similar strategies, countries have experienced vastly different results. From Thailand's success as an assembly hub for foreign automakers and China's

unexpected achievements in building its own car industry, to South Korea's impressive development of an integrated industry, to the Philippines' persistent weakness, these divergent paths offer a fascinating window into the determinants of economic growth. The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions. Utilizing interviews and original-language research from multiple nations, this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development. Richard F. Doner, Gregory W. Noble, and John Ravenhill instead highlight the significance of two sets of factors: countries' very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions. Through cross-national analyses of China, Taiwan, South Korea, Indonesia, Malaysia, the Philippines, and Thailand, the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms. Brief comparisons with Brazil, Mexico, and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science, which fail to give sufficient emphasis to the role of public and public-private institutions, or provide an explanation of the political bases of those institutions. In a world where auto assemblers and suppliers are facing new challenges in an ever-evolving industry--such as the transition to electric and autonomous vehicles--this book offers a crucial perspective on the centrality of institutional capacities and political economy. By tracing the divergent trajectories of seven nations, The Political Economy of Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth.

Edmunds.com New Car & Trucks Buyers Guide 2005 Annual Dundurn

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." - The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

Condé Nast's Traveler Dundurn

This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than forty-five years, pulls no punches. Contrasting Regional, National, and Global Perspectives Gale Cengage

All Hyundai Santa Fe models, 01 thru 06. Plunkett Research, Ltd.

The World's Cities offers instructors and students in higher education an accessible introduction to the three major perspectives influencing city-regions worldwide: City-Regions in a World System; Nested City-Regions; and The City-Region as the Engine of Economic Activity/Growth. The book provides students with helpful essays on each perspective, case studies to illustrate each major viewpoint, and discussion questions following each reading. The World's Cities concludes with an original essay by the editor that helps students understand how an analysis incorporating a combination of theoretical perspectives and factors can provide a richer appreciation of the world's city dynamics.
