The American Jewish Year Book, which spans three different centuries, is the annual record of the North American Jewish communities and provides insight into their major trends. Part I of the current volume contains the lead article: Chapter 1, "Pastrami, Verklempt, and Tshoot-spa: Non-Jews' Use of Jewish Language in the US" by Sarah Bunin Benor. Following this chapter are three on domestic and international events, which analyze the year's events as they affect American Jewish communal and

political affairs. Three chapters analyze the demography and geography of the US, Canada, and world Jewish populations. Part II provides lists of Jewish institutions, including federations, community centers, social service agencies, national organizations, synagogues, Hillels, camps, museums, and Israeli consulates. The final chapters present national and local Jewish periodicals and broadcast media; academic resources, including Jewish Studies programs, books, journals, articles, websites, and research libraries; and lists of major events in the past year, Jewish honorees, and obituaries. While written mostly by academics, this volume conveys an accessible style, making it of interest to public officials, professional and lay leaders in the Jewish community, as well as the general public and academic researchers. The American Jewish Year Book has been a key resource for social scientists exploring comparative and historical data on Jewish population patterns. No less important, the Year Book serves organization leaders and policy makers as the source for valuable data on Jewish communities and as a basis for planning. Serious evidence-based articles regularly appear in the Year Book that focus on analyses and reviews of critical issues facing American Jews and their communities which are indispensable for scholars and community leaders. Calvin Goldscheider, Professor Emeritus of Sociology and Ungerleider Professor Emeritus of Judaic Studies, Brown University They have done it again. The American Jewish Year Book has produced yet another edition to add to its distinguished tradition of providing facts, figures and analyses of contemporary life in North America. Its well-researched and easily accessible essays offer the most up to date scrutiny of topics and challenges of importance to

American Jewish life; to the American scene of which it is a part and to world Jewry. Whether one is an academic or professional member of the Jewish community (or just an interested reader of all things Jewish), there is not another more impressive and informative reading than the American Jewish Year Book. This Hugo Award finalist, “justifiably regarded as a classic” (SFReviews.net), is the tale of an epic space voyage where time dilation goes horribly wrong. Aboard the spacecraft Leonora Christine, fifty crewmembers, half men and half women, have embarked on a journey of discovery like no other to a planet thirty light-years away. Since their ship is not capable of traveling faster than light, the crew will be subject to the effects of time dilation and relativity. They will age five years on board the ship before reaching their destination, but thirty-three years will pass on Earth. Experienced scientists and researchers, they have come to terms with the time conditions of their space travel. Until . . . the Leonora Christine passes through an uncharted nebula, which damages the engine, making it impossible to decelerate the ship on the second half of their trip. To survive, the crewmembers have no choice but to bypass their destination and continue to accelerate toward the speed of light. But how will they keep hope alive and maintain order as they hurtle deeper into space with time passing more and more rapidly, and their ultimate fate unknown? With its combination of mind-blowing hard science and compelling human drama, *Tau Zero* is “the ultimate hard science novel” (Mike Resnick).

Nere has never understood why she feels so much more comfortable and confident in water than on land, but everything falls into place when Nere learns that she is one of a group of kids who --unbeknownst to them -- have been genetically altered to survive in the ocean. These products of "The Neptune Project" will be able to build a better future under the sea, safe from the barren country's famine, wars, and harsh laws. But there are some very big problems: no one asked Nere if she wanted to be a science experiment, the other Neptune kids aren't exactly the friendliest bunch, and in order to reach the safe haven of the Neptune colony, Nere and her fellow mutants must swim through hundreds of miles of dangerous waters, relying only on their wits, dolphins, and each other to evade terrifying undersea creatures and a government that will stop at nothing to capture the Neptune kids . . . dead or alive. Fierce battles and daring escapes abound as Nere and her friends race to safety in this action-packed aquatic adventure.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

ABSTRACT: Helping patients achieve an optimal quality of life through patient-centered treatment planning should be the ultimate goal of all oral health care providers. However, this issue extends beyond the realm of the individual clinician's office. This text presents quality-of-life research from various fields, including psychology, public health, and general health care; discusses how a patient-centered approach can be applied to basic oral and craniofacial research, clinical dental practice, community dental health issues, and dental education; and addresses how oral health-related quality of life relates to treating and understanding different patient populations, such as children with special needs, medically compromised patients, patients with oral cancer, and patients with chronic facial pain. Also discussed is how factors such as race/ethnicity, gender, and age can affect oral health-related quality-of-life concerns and treatment strategies. Finally, the book offers an outlook on the role that oral health-related quality of life will play in future research and dental education. *Carols and Crushes: A Wish Novel* Little, Brown Books for Young Readers

Newbery Medal winner Sharon Creech crafts a truly endearing story, one that is imbued with happiness, wonder, and an appreciation for all the little things that make life big. With beautiful, fresh new cover art, this is a gem of a book. In the winding stone tower of the Casa Rosa, in a quiet little village in the Swiss Alps, lives one very unlikely angel—one that is still awaiting her instructions from the angel-training center. What happens to an angel who doesn't know her mission? She floats and swishes from high above, watching the crazy things that "peoples" say and do. But when a zany American girl named Zola arrives in town and invades the Casa Rosa, dogs start arfing, figs start flying through the air, lost orphans wander in, and the village becomes anything but quiet. And as Zola and the angel

work together to rescue the orphans, they each begin to realize their purpose and learn that there is magic in the most ordinary acts of kindness.
