Nothing is right about this place or the other students in it. Here I am, a mere mortal among gods...or monsters. I still can't decide which of these warring factions I belong to, if I belong at all. I only know the one

thing that unites them is their hatred of me. Then there's Jaxon Vega. A vampire with deadly secrets who hasn't felt anything for a hundred years. But there's something about him that calls to me, something broken in him that somehow fits with what's broken in me. Which could spell death for us all. Because Jaxon walled himself off for a reason. And now someone wants to wake a sleeping monster, and I'm wondering if I was brought here intentionally—as the bait. \*\*\*INCLUDES 3 BONUS SCENES FROM THE HERO'S POV\*\*\* Don't miss a single book in the series that spawned a phenomenon! A standalone title in New York Times bestselling author Vivian Arend's light-hearted, feel-good paranormal series.

~~~~~ Into the best-laid plans a little chaos must fall... Wolf-about-town, Jared Gilliland, hides secrets within secrets, but his love of the female persuasion isn't one of them. It's woman-trouble that disrupts his quiet morning coffee near the harbor and ends with him on a cruise ship impersonating one of his pack mates. No worries. It's just a new adventure to enjoy—until he's confronted with someone who makes his

inner wolf sit up and howl. Suddenly, Jared's stuck in limbo; wanting to protect, needing to stay away. Keri Smith joined her best friend for the shifter-only sailing of the Arctic Wolf Cruise. Her job is supposed to be trouble-shooter, so while she's nearly positive the last-minute recruit sneaking aboard the tour is her mate, ix-nay on confirming that at least for the next ten days. Getting tangled up in mating lust would reduce her skills to nil. Avoidance of the sexy wolf for the duration of the cruise, followed by jumping his bones, seems the logical solution. But when libidos are on the line, "logic" and "wolves" don't go together. Warning: Really? You need to be warned about the hot nookie and sarcasm? Yeah, it's in here. Also, colourful cat shifters, lupine

royalty, and wild adventures in cabins like you've never seen before. -----

Michelle Kennedy had a typical middle class American childhood in Vermont. She attended college, interned in the U.S. Senate, married her high school sweetheart and settled in the suburbs of D.C. But the comfortable life she was building quickly fell apart. At age twenty-four Michelle was suddenly single, homeless, and living out of a car with her three small children. She waitressed night shifts while her kids slept out in the diner's parking lot. She saved her tips in the glove compartment, and set aside a few quarters every week for truck stop showers for her and the kids. With startling humor and honesty, Kennedy describes the frustration of never having

enough money for a security deposit on an apartment—but having too much to qualify for public assistance. Without A Net is a story of hope. Michelle Kennedy survives on her wits, a little luck, and a lot of courage. And in the end, she triumphs.

 As with other transportation methods, safety issues in aircraft can result in a total loss of life. Recently, the air transport industry has come under immense scrutiny after several deaths occurred due to aircraft design and airlines that allowed improperly inspected aircraft to fly. Spacecraft too have found errors in system software that could lead to catastrophic failure. It

is imperative that the aviation and aerospace industries continue to revise and refine safety protocols from the construction and design of aircraft, to secure and improve aviation systems, and to test and inspect aircraft. The Research Anthology on Reliability and Safety in Aviation Systems, Spacecraft, and Air Transport is a vital reference source that examines the latest scholarly material on the use of adaptive and assistive technologies in aviation to establish clear guidelines for the design and implementation of such technologies to better serve the needs of both military and civilian pilots. It also covers new information technology use in aviation systems to streamline the cybersecurity, decision making, planning, and design processes within the aviation industry.

Highlighting a range of topics such as air navigation systems, computer simulation, and airline operations, this multi-volume book is ideally designed for pilots, scientists, engineers, aviation operators, air traffic controllers, air crash investigators, teachers, academicians, researchers, and students.

I'm a Gemini. Impulsive. Curious. Headstrong. A twin. Heir to a throne I know nothing about. And it turns out, I'm Fae. But of course there's a catch - all I have to do to claim my birth right is prove that I'm the most powerful supernatural in the whole of Solaria. And

sure, technically that's true as I'm the daughter of the Savage King. But the bit they didn't put in the brochure was that every single Fae in this Kingdom would claim my throne if they could. The school they've sent me to is both dangerous as sh\*t and one helluva party. Vampires bite weaker students in the corridors, the Werewolf pack has orgies in the Wailing Wood at every full moon and don't even get me started on the dark and twisted ways the Sirens use their powers on people's emotions, or how my sinfully tempting Cardinal Magic teacher hosts detentions that leave people needing therapy. Classes are totally interesting if you manage to live through them. And that Gemini star sign I mentioned? It now determines my elemental magic and affects my destiny,

so learning astrology is essential if I'm going to beat down my classmates - which is actively encouraged by the way. My biggest problem is the drool worthy Dragon shifter who has his eyes on my throne. He and his three psycho friends are determined to make my time here hell. All I've got to do is survive. But fate might have other ideas. Dammit, why couldn't I have gotten a letter to Hogwarts?
