Mobile Notaries have been a recognized profession for many years, providing a valuable service to those who can't go to a Notary, or just prefer the

convenience of having the Notary come to them. Mobile Notaries typically charge for their mobile services in addition to any notarization fees. In relatively recent years, the loan and real estate industry has developed a need for Notary loan signing agents who guide a borrower through the process of signing the paperwork in a loan package, as well as witnessing and notarizing certain documents included in that packet. This provides an even greater potential for

income to the mobile Notary. However, mobile Notaries can still make a very good living notarizing a myriad of non-loan documents without entering the loan signing industry at all. Becoming a Notary Public as an add-on service to your current employment or business is a good way to start your mobile Notary service. Not only will it give you an edge over competition for company positions and promotions, but will start you off with contacts and clients that will help your business

quickly grow from part-time to full-time. This guide will show you how to start your own business as a mobile Notary Public either part-time or full-time.

The office of notary public has a long and proud history in our society. Their work is rarely glamorous, but it is so important that the highest courts in the nation routinely accept properly notarized documents as evidence in legal matters. In fact, the law governing

notaries gives them the same mission as sworn law enforcement officers, "to serve and protect."

A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents

the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement,

oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual. Xlibris Corporation NEWLY REVISED and expanded 2016!
