Introduction to Genetics. process in  
which the number of chromosomes per  
cell is cut in half through the separation  
of homologous chromosomes in a diploid  
cell. Chapter 11 Introduction to Genetics |

Science Flashcards ... Chapter 11  
Introduction to Genetics. - Mendel  
assumed that a dominant allele had  
masked the corresponding recessive  
allele in the F1 generation. - At some  
point, the allele for shortness was  
segregated, or separated, from the allele  
for tallness. Chapter 11 Introduction to  
Genetics Flashcards | Quizlet Genetics  
and Probability. Probability. is the  
likelihood that an event will occur.  
Scientists use probability to predict the  
outcomes of genetic crosses. If a coin is  
flipped once, the chance that it will be  
heads is  $1/2$ . If it is flipped three times in  
a row, the probability of flipping all  
heads is?  $1/2 \times 1/2 \times 1/2 = \underline{\hspace{1cm}}$  Chapter
