He showed how to build a client using the same technologies available for

all other platforms Delphi supports. DataSnap Android Clients - MarcoCantuThe Multi-Tier FireDAC DataSnap driver supports: DataSnap servers built with RAD Studio 2007 and later. DataSnap clients built with RAD Studio XE2 Enterprise and later. Client Software. FireDAC statically links the Embarcadero DataSnap dbExpress driver, so no additional files and DLLs are required. Supported are RAD Studio XE2 Enterprise and later. Connect to DataSnap

Server (FireDAC) - RAD Studio
This tutorial describes how to connect to an Enterprise database from a mobile client application. To connect to an Enterprise Database, you need to have a client library. In most cases, the client library is provided by the database vendor in DLL format. This strategy does not work well for mobile devices because no client library is available.
