The Ultimate Guide to Being the Kind of Person That Finishes a Doctoral Dissertation Or Thesis Rowman & Littlefield

For more than thirty years, Writing for Social Scientists has been a lifeboat for

writers in all fields, from beginning students to published authors. It starts with a powerful reassurance: Academic writing is stressful, and even accomplished scholars like sociologist Howard S. Becker struggle with it. And it provides a clear solution: In order to learn how to write, take a deep breath and then begin writing. Revise. Repeat. This is not a book about sociological writing. Instead, Becker

applies his sociologist's eye to some of the common problems all academic writers face, including trying to get it right the first time, failing, and therefore not writing at all; getting caught up in the trappings of "proper" academic writing; writing to impress rather than communicate with readers; and struggling with the when and how of citations. He then offers concrete advice, based on his own experiences and those of his students and colleagues, for overcoming these obstacles and gaining confidence as a writer. While the underlying challenges of writing have remained the same since the book first appeared, the context in which academic writers work has changed dramatically, thanks to rapid changes in technology and ever greater institutional pressures. This new edition has been updated throughout to reflect these changes, offering a new generation of scholars and students encouragement to write about society or any other scholarly topic clearly and persuasively. As Becker writes in the new preface, "Nothing prepared me for the steady stream of mail from readers who found the book helpful. Not just helpful. Several told me the book had saved their

lives; less a testimony to the book as therapy than a reflection of the seriousness of the trouble writing failure could get people into." As academics are being called on to write more often, in more formats, the experienced, rational advice in *Writing for Social Scientists* will be an important resource for any writer's shelf.

Umberto Eco's wise and witty guide to researching and writing a thesis, published in English for the first time. By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy's most celebrated intellectuals, a distinguished academic and the author of influential works on semiotics. Some years before that, in 1977, Eco published a little book for his students, *How to Write a Thesis*, in which he offered useful advice on all the steps involved in researching and writing a thesis—from choosing a topic to organizing a work schedule to writing the final draft. Now in its twenty-third edition in Italy and translated into seventeen languages, *How to Write a Thesis* has become a classic. Remarkably,

this is its first, long overdue publication in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise. *How to Write a Thesis* is unlike any other writing manual. It reads like a novel. It is opinionated. It is frequently irreverent, sometimes polemical, and often hilarious. Eco advises students how to avoid "thesis neurosis" and he answers the important question "Must You Read Proust?" and "Write everything that comes into your head, but only in the first draft." Of course, there was no Internet in 1977, but Eco's index card research system offers important lessons about critical thinking and information curating for students of today who may be burdened by Big Data. *How to Write a Thesis* belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere. Already a classic, it would fit nicely between two other classics: *Strunk and White* and *The Name of the Rose*. Contents The Definition and Purpose of a Thesis • Choosing the Topic • Conducting Research • The Work Plan and the Index Cards • Writing the

Thesis • The Final Draft

Students and researchers all write under pressure, and those pressures—most lamentably, the desire to impress your audience rather than to communicate with them—often lead to pretentious prose, academic posturing, and, not infrequently, writer’s block. Sociologist Howard S. Becker has written the classic book on how to conquer these pressures and simply write. First published nearly twenty years ago, *Writing for Social Scientists* has become a lifesaver for writers in all fields, from beginning students to published authors. Becker’s message is clear: in order to learn how to write, take a deep breath and then begin writing. Revise. Repeat. It is not always an easy process, as Becker wryly relates. Decades of teaching, researching, and writing have given him plenty of material, and Becker neatly exposes the foibles of academia and its “publish or perish” atmosphere. Wordiness, the passive voice, inserting a “the way in which” when a simple “how” will do—all these mechanisms are a part of the social structure of academic writing.

By shrugging off such impediments—or at the very least, putting them aside for a few hours—we can reform our work habits and start writing lucidly without worrying about grades, peer approval, or the “literature.” In this new edition, Becker takes account of major changes in the computer tools available to writers today, and also substantially expands his analysis of how academic institutions create problems for them. As competition in academia grows increasingly heated, *Writing for Social Scientists* will provide solace to a new generation of frazzled, would-be writers.

Expert writing advice from the editor of the Boston Globe best-seller, *The Writer's Home Companion* Dissertation writers need strong, practical advice, as well as someone to assure them that their struggles aren't unique. Joan Bolker, midwife to more than one hundred dissertations and co-founder of the Harvard Writing Center, offers invaluable suggestions for the graduate-student writer. Using positive reinforcement, she begins by reminding thesis writers that

being able to devote themselves to a project that truly interests them can be a pleasurable adventure. She encourages them to pay close attention to their writing method in order to discover their individual work strategies that promote productivity; to stop feeling fearful that they may disappoint their advisors or family members; and to tailor their theses to their own writing style and personality needs. Using field-tested strategies she assists the student through the entire thesis-writing process, offering advice on choosing a topic and an advisor, on disciplining one's self to work at least fifteen minutes each day; setting short-term deadlines, on revising and defing the thesis, and on life and publication after the dissertation. Bolker makes writing the dissertation an enjoyable challenge.

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “You know something!” I would say if it could hear me. “Now tell it to us in language we can understand!” Since its publication in 2005, *From Dissertation to Book* has helped

thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a

book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

The history of slavery in early America is a history of suicide. On ships crossing the Atlantic, enslaved men and women refused to eat or leaped into the ocean. They strangled or hanged themselves. They tore open their own throats. In

America, they jumped into rivers or out of windows, or even ran into burning buildings. Faced with the reality of enslavement, countless Africans chose death instead. In *The Power to Die*, Terri L. Snyder excavates the history of slave suicide, returning it to its central place in early American history. How did people—traders, plantation owners, and, most importantly, enslaved men and women themselves—view and understand these deaths, and how did they affect understandings of the institution of slavery then and now? Snyder draws on ships' logs, surgeons' journals, judicial and legislative records, newspaper accounts, abolitionist propaganda and slave narratives, and many other sources to build a grim picture of slavery's toll and detail the ways in which suicide exposed the contradictions of slavery, serving as a powerful indictment that resonated throughout the Anglo-Atlantic world and continues to speak to historians today.

Research shows that five strategies

correlate with the successful completion of a dissertation: Establishing a consistent writing routine Working with a support group Consulting your advisor Understanding your committee's expectations Setting a realistic and timely schedule Building on these insights, this book is for anyone who needs help in preparing for, organizing, planning, scheduling, and writing the longest sustained writing project they have encountered, particularly if he or she is not receiving sufficient guidance about the process, but also for anyone looking to boost his or her writing productivity. The author uncovers much tacit knowledge, provides advice on working with dissertation advisors and committee members, presents proven techniques for the prewriting and writing stages of the dissertation, sets out a system for keeping on schedule, and advocates enlisting peer support. As Peg Boyle Single states, "my goal is quite simple and straightforward: for you to experience greater efficiency and enjoyment while writing. If you experience anxiety, blocking, impatience, perfectionism or procrastination when you write, then this system is for you. I want

you to be able to complete your writing so that you can move on with the rest of your life." Few scholars, let alone graduate students, have been taught habits of writing fluency and productivity. The writing skills imparted by this book will not only help the reader through the dissertation writing process, but will serve her or him in whatever career she or he embarks on, given the paramount importance of written communication, especially in the academy. This book presents a system of straightforward and proven techniques that are used by productive writers, and applies them to the dissertation process. In particular, it promotes the concept of writing networks – whether writing partners or groups – to ensure that writing does not become an isolated and tortured process, while not hiding the need for persistence and sustained effort. This book is intended for graduate students and their advisers in the social sciences, the humanities, and professional fields. It can further serve as a textbook for either informal writing groups led by students or for formal writing seminars offered by departments or graduate colleges. The techniques

described will help new faculty advise their students more effectively and even achieve greater fluency in their own writing.
