About the Novel: Frindle is the story of a clever, time-wasting schemer's innovative plan to create his own word for the dictionary. Ten-year-old Nick Allen has a reputation for developing ingenious plans that distract teachers. For the first time ever, his diversions fail to create the desired results in Mrs. Granger's fifth grade language arts class. Instead of distracting her, he ends up with an extra assignment and oral presentation on how new entries are added to the dictionary. Surprisingly, the boring assignment leads to Nick's most clever idea yet when he decides to create his own new word—frindle. Nick recruits five fellow students to support his efforts in changing the name of pen to frindle. Their insistence on referring to pens as frindles causes a major commotion when Mrs. Granger's passion for vocabulary and strict emphasis on the correct use of language result in a battle of wills that threatens to disrupt the whole school. Their war of words spreads beyond the school resulting in after-school punishments, a home visit from the principal, national publicity, economic opportunities for local businessmen, and, eventually inclusion in the dictionary.

Lesson Study as Pedagogic Transfer

Educational Technology
 This book examines education transfer, specifically focusing on pedagogic transfer, and analyzes what happens when lesson

study is introduced into foreign contextual settings. Lesson study, a professional development approach that originated in Japan 150 years ago, has been widely considered one of the best practices for collaborative professional development. There is an underlying assumption behind education transfer that when “best practice” is transferred to another country, it will generate a similar effect and improve schooling quality. Since pedagogic practice is socially constructed, the best practice in one setting may not be meaningful in another contextual setting. This book makes a unique contribution to the field of comparative education by offering a sociological examination of why pedagogic transfer often fails to bring expected benefits. It is comprised of three parts. Part I, “Pedagogic Transfer and Lesson study,” provides contextualized analysis of lesson study in Japan and abroad and presents how the meaning of practice is always reinterpreted against the local educational context. Part II presents a sociological analysis of Indonesian teachers’ practice based on ethnographic fieldwork. It conceptually analyses the nature of the teacher community and their practice and is presented as “teacher strategies.” The concept showed that teacher culture and practice are not fixed but constantly negotiated within the institutional setting. Part III, “Sociological Understanding of Pedagogic Transfer,” builds on the analyses in Part I and II and provides a theoretical understanding of the issue of pedagogic transfer. Professional responsibilities of teachers, collegiality, and teaching expertise in Japan and Indonesia are compared to understand how the meaning of lesson study was reconstructed in the Indonesian setting. In conclusion, recommendations for an alternative approach to professional development are offered.
