STATISTICAL METHODS FOR PSYCHOLOGY, 8E, International Edition surveys the statistical techniques commonly used in the behavioral and social sciences, particularly psychology and education. To help students gain a better understanding of the specific statistical hypothesis tests that are covered throughout the text, author David Howell emphasizes conceptual understanding. This Eighth Edition continues to focus students on two key themes that are the cornerstones of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics—reflecting the evolving realm of statistical methods—include effect size, meta-analysis, and treatment of missing data.

STATISTICS IN PSYCHOLOGY AND EDUCATION S. Chand Publishing

This text is a classic in Indian political literature as the original author belongs to the Idealist school of great political thinkers such as T H Green and Bosanquet. It is a comprehensive treatise on basic structure of established political theories, be it Bosanquet's idealistic theory of the State to liberal and anti-idealistic view, as expressed by L T Hobhouse, to the Marxist theory of the State. The textbook follows an ideological approach where it rejects the attitude of those behaviourists who place undue emphasis on methods, techniques and skills rather than on first principles and value judgements. It is developed for the undergraduate students of Political Science (Pass and honours courses). Aspirants of various competitive examinations such as Civil Services Examination and state public service commission examinations will also find the book extremely useful.
