Why Bother with History? Oxford University Press

A lively and engaging narrative history showing the common threads in the cultures that gave birth to our own. This is the first volume in a bold new series that tells the stories of all peoples, connecting historical events from Europe to the Middle East to the far coast of China, while still giving weight to the characteristics of each country. Susan Wise Bauer provides both sweeping scope and vivid attention to the individual lives that give flesh to abstract assertions about human history. Dozens of maps provide a clear geography of great events, while timelines give the reader an ongoing sense of the passage of years and cultural interconnection. This old-fashioned narrative history employs

the methods of "history from beneath"—literature, epic traditions, private letters and accounts—to connect kings and leaders with the lives of those they ruled. The result is an engrossing tapestry of human behavior from which we may draw conclusions about the direction of world events and the causes behind them.

Who were the first Britons, and what sort of world did they occupy? In A History of Ancient Britain, much-loved historian Neil Oliver turns a spotlight on the very

beginnings of the story of Britain; on the first people to occupy these islands and their battle for survival. There has been human habitation in Britain, regularly interrupted by Ice Ages, for the best part of a million years. The last retreat of the glaciers 12,000 years ago brought a new and warmer age and with it, one of the greatest tsunamis recorded on Earth which struck the north-east of Britain, devastating the population and flooding the low-lying plains of what is now the North Sea. The resulting island became, in time, home to a diverse range of cultures and peoples who have left behind them some of the most extraordinary and enigmatic monuments in the world. Through what is revealed by the artefacts of the past, Neil Oliver weaves the epic story - half a million years of human history up to the departure of the Roman Empire in the Fifth Century AD. It was a period which accounts for more than ninety-nine per cent of humankind's presence on these islands. It is the real story of Britain and of her people.

The ancient world comes to life in the first volume in a two book series on the history of Egypt, spanning the first farmers to the construction of the pyramids. Famed archaeologist John Romer draws on a lifetime of research to tell one history's greatest stories; how, over more than a thousand years, a society of farmers created a rich, vivid world where one of the most astounding of all human-made landmarks, the Great Pyramid, was built. Immersing the reader in the Egypt of the past, Romer examines and challenges the long-held theories about what archaeological finds mean and what stories they tell about how the Egyptians lived. More than just an account of one of the most fascinating periods of history, this engrossing book asks readers to take a step back and question what they've learned about Egypt in the past. Fans of Stacy Schiff's Cleopatra and history buffs will be captivated by this re-telling of Egyptian history, written by one of the top Egyptologists in the world.

.Why Bother With History? argues for an increasingly important role for a revitalised historical study. Examining the motivations of past historians, the author rejects the ancient aspiration to a 'history for its own sake' and argues that historians' importance lies in their own adoption of a moral standpoint, from which a story of the past can be told, that facilitates the attainment of a future we desire. Inevitably controversial, in that it challenges many of the assumptions of modernist history, this is an interdisciplinary book, which draws in particular on psychology and literature.

In SPQR, an instant classic, Mary Beard narrates the history of Rome "with passion and without technical jargon" and demonstrates how "a slightly shabby Iron Age village" rose to become the "undisputed hegemon of the Mediterranean" (Wall Street Journal). Hailed by critics as animating "the grand sweep and the intimate details that bring the distant past vividly to life" (Economist) in a way that makes "your hair stand on end" (Christian Science Monitor) and spanning nearly a thousand years of history, this "highly informative, highly readable" (Dallas Morning News) work examines not just how we think of ancient Rome but challenges the comfortable historical perspectives that have existed for centuries. With its nuanced attention to class, democratic struggles, and the lives of entire groups of people omitted from the historical narrative for centuries, SPQR will to shape our view of Roman history for decades to come.

If ancient history is particularly susceptible to a top-down approach, due to the nature of our evidence and its traditional exploitation by modern scholars, another ancient history—'from below'—is actually possible. This volume examines the possibilities and challenges involved in

writing it. Despite undeniable advances in recent decades, 'our slowness to reconstruct plausible visions of almost any aspect of society beyond the top-most strata of wealth, power or status' (as Nicholas Purcell has put it) remains a persistent feature of the field. Therefore, this book concerns a historical field and social groups that are still today neglected by modern scholarship. However, writing ancient history 'from below' means much more than taking into account the anonymous masses, the subaltern classes and the non-elites. Our task is also, in the felicitous expression coined by Walter Benjamin, 'to brush history against the grain,' to rescue the viewpoint of the subordinated, the traditions of the oppressed. In other words, we should understand the bulk of ancient populations in light of their own experience and their own reactions to that experience. But, how do we do such a history? What sources can we use? What methods and approaches can we employ? What concepts are required to this endeavour? The contributions mainly engage with questions of theory and methodology, but they also constitute inspiring case studies in their own right, ranging from classical Greece to the late antique world. This book is aimed not only at readers working on classical Greece, republican and imperial Rome and late antiquity but at anyone interested in 'bottom-up' history and social and population history in general. Although the book is primarily intended for scholars, it will also appeal to graduate and undergraduate students of history, archaeology and classical studies.

This collection of essays explores the lives and roles of women in antiquity. A recurring theme is the relationship between private and public, and many of the essays find that women's public roles develop as a result of their private lives, specifically their family relationships.

Essays on Hellenistic queens and Spartan and Roman women document how women exerted political power--usually, but not always, through their relationship to male leaders--and show how political upheaval created opportunities for them to exercise powers previously reserved for men.

Essays on the writings of Sappho and Nossis focus on the interaction between women's public and private discourses. The collection also includes discussion of Athenian and Roman marriage and the intrusion of the state into the sexual lives of Greek, Roman, and Jewish women as well as an investigation of scientific opinion about female physiology. The contributors are Sarah B. Pomeroy, Jane McIntosh Snyder, Marilyn M. Skinner, Cynthia B. Patterson, Ann Ellis Hanson, Lesley Dean-Jones, Natalie Boymel Kampen, Mary Taliaferro Boatwright, and Shaye J.D. Cohen.
