## **REED HUGHES**

---

*Tourism Geography* Routledge  
Destinations across the world are beginning to replace or supplement culture-led development strategies with creative development. This book critically analyzes the impact and

effectiveness of creative strategies in tourism development and charts the emergence of 'creative tourism'. Why has 'creativity' become such an important aspect of development strategies and of tourism development in particular? Why is this happening now, apparently simultaneously, in so many destinations across the globe? What is the difference between cultural tourism and creative tourism? These are among the important questions this book answers. It critically examines the developing relationship between tourism and creativity, the articulation of the 'creative

turn' in tourism, and the impact this has on theoretical perspectives and practical approaches to tourism development. A wide range of examples from Europe, North America, Asia, Australia and Africa explore the interface between tourism and creativity including: creative spaces and places such as cultural and creative clusters and ethnic precincts; the role of the creative industries and entrepreneurs in the creation of experiences; creativity and rural areas; the 'creative class' and tourism; lifestyle, creativity and tourism and marketing creative tourism destinations. The relationship between individual and collective forms of creativity and the widely differing forms of modern tourism are also discussed. In the concluding section of the book the contribution of creativity to tourism and to development strategies in general is assessed, and areas for future research are outlined. The diverse multidisciplinary contributions link theory and practice, and demonstrate the strengths and weaknesses of creativity as a tourism development strategy and marketing tool. It is the first exploration of the relationship between tourism and creativity and its consequences for tourism development in different parts of the world.

*Towards an Integrative Agenda on Urban Tourism* Taylor & Francis

This book gives an overview of the positions in the rapidly evolving debate over the sociocultural footprint of tourism on its destinations. Overtourism, its impact and subsequent mitigating measures taken, have started to dominate political discussions in European cities such as Amsterdam, Barcelona, Seville and Berlin.

Cultural Heritage and Tourism Routledge

For human geographers, a central theme within the discipline is interpreting and understanding our changing world – a world in which geographic patterns are constantly being reworked by powerful forces of change. These forces include population shifts, new patterns of economic production and consumption, evolving social and political structures, new forms of urbanism, and globalisation and the compressions of time and space that are the product of the ongoing revolutions in information technology and telecommunications. This book attempts to show how tourism has also come to be a major force for change as an integral and indispensable part of the places in which we live, their economies and their societies. When scarcely a corner of the globe remains untouched by the influence of tourism, this is a phenomenon that we can no longer ignore. Tourism is also an intensely geographic phenomenon. It exists through the desire of people to move in search of embodied experience of other places as individuals and en masse and at scales from the local to the increasingly global. Tourism creates distinctive relationships between people (as tourists) and the host spaces, places and people they visit, which has significant implications for destination development and resource use and exploitation, which are exhibited through a range of economic, social, cultural and environmental impacts that have important implications for local geographies. This third edition of *Tourism Geography: critical understandings of place, space and experience* presents an essential understanding of critical perspectives on how tourism places and spaces are created and maintained. Drawing on the holistic nature of geography, a range of social science disciplinary views are presented, including both historical and

contemporary perspectives. Fundamentally, however, the book strives to connect tourism to key geographical concepts of globalisation, mobility, production and consumption, physical landscapes, and post-industrial change. The book is arranged in five parts. Part I provides an overview of fundamental tourism definitions and concepts, along with an introduction to some of the major themes in contemporary geographic research on tourism, which are further developed in subsequent chapters of this book. In Part II the discussion focuses on how spatial patterns of modern tourism have evolved through time from regional to global geographies. Part III offers an extended discussion of how tourism relates to places that are toured through their economic landscape, contemporary environmental change and socio-cultural relations. Part IV explores a range of major themes in the geographies of tourism, including place creation and promotion, the transformation of urban tourism, heritage and place identity, and creating personal identity through consumption, encounters with nature and other embodied forms of tourism experience. Part V turns to applied geography with an overview of the different roles of planning for tourism as a means of spatial regulation of the activity, and a look at emerging themes in the critical geography of contemporary and future geographies of tourism. This third edition has been revised by Dr Alan A. Lew, who becomes the new co-author of *Tourism Geography*. Some of the major revisions that I have incorporated include moving most of the case study boxes to the website <http://tourismgeography.com>, which will provide a growing wealth of new case studies, over time. I have also incorporated new material, reorganised some of the content to balance the

topics covered, created a new concluding chapter that explores some recently emerging perspectives in critical tourism geography, and re-written the text to make it more accessible to a global English-speaking world. That said, the book is still very much the work of Dr Stephen Williams. As such, it maintains its original concise yet comprehensive review of contemporary tourism geography and the ways in which geographers critically interpret this important global phenomenon. It is written as an introductory text for students, and includes guidance for further study in each chapter that can form the basis for independent work. Lecturers using this textbook are welcome to contribute to the book's content developing through the supporting website by contacting me at any time.

Sixth International IACuDiT Conference, Athens 2019 Routledge

This book is designed to illustrate many of the issues and approaches associated with sustainable tourism development, policy and research. Included are case studies of tourism development using both quantitative and qualitative methods, analytical frameworks for managing tourism and chapters addressing critical questions about the relationship between tourism and sustainability goals. As a whole, the book demonstrates the many dimensions and topics associated with attempts to address the complex issues associated with sustainability and tourism. Added in this second edition, are several new chapters that address emerging issues in management of tourism. Part I (Frameworks and Approaches) discusses the need for integration of social and environmental issues in tourism development. Part II (Tourism and Place) explicitly recognizes the importance of understanding the values

and attributes of areas that become tourist destinations. Part III (Emerging Issues in Culture and Tourism) illustrates that we live in a dynamic world, that what was once acceptable is no longer, that our mental models of tourism development are in constant change and that researchers and policy makers must be alert to shifting public values and beliefs. This part includes material on local attitudes, poverty alleviation, indigenous people and tourism, and a discussion about culture and tourism. The book has 16 chapters and a subject index.

*ISCONTOUR 2019 Tourism Research Perspectives* Springer

This book explores a wide range of emerging cultural, heritage, and other tourism issues that will shape the future of hospitality and tourism research and practice in the digital and innovation era. It offers stimulating new perspectives in the fields of tourism, travel, hospitality, culture and heritage, leisure, and sports within the context of a knowledge society and smart economy. A central theme is the need to adopt a more holistic approach to tourism development that is aligned with principles of sustainability; at the same time, the book critically reassesses the common emphasis on innovation as a tool for growth-led and market-oriented development. In turn, fresh approaches to innovation practices underpinned by ethics and sustainability are encouraged, and opportunities for the exploration of new research avenues and projects on innovation in tourism are highlighted. Based on the proceedings of the Sixth International Conference of the International Association of Cultural and Digital Tourism (IACuDiT) and edited in collaboration with IACuDiT, the book will appeal to a broad readership encompassing academia, industry, government, and other organizations.

*Tourists, Signs and the City* CRC Press

The Routledge Handbook of Cultural Tourism explores and critically evaluates the debates and controversies in this field of Tourism. It brings together leading specialists from a range of disciplinary backgrounds and geographical regions, to provide state-of-the-art theoretical reflection and empirical research on this significant stream of tourism and its future direction. The book is divided into 7 inter-related sections. Section 1 looks at the historical, philosophical and theoretical framework for cultural tourism. This section debates tourist autonomy role play, authenticity, imaginaries, cross-cultural issues and inter-disciplinarity. Section 2 analyses the role that politics takes in cultural tourism. This section also looks at ways in which cultural tourism is used as a policy instrument for economic development. Section 3 focuses on social patterns and trends, such as the mobilities paradigm, performativity, reflexivity and traditional hospitality, as well as considering sensitive social issues such as dark tourism. Section 4 analyses community and development, exploring adaptive forms of cultural tourism, as well as more sustainable models for indigenous tourism development. Section 5 discusses Landscapes and Destinations, including the transformation of space into place, issues of authenticity in landscape, the transformation of urban and rural landscapes into tourism products and conservation versus development dilemmas. Section 6 refers to Regeneration and Planning, especially the creative turn in cultural tourism, which can be used to avoid problems of serial reproduction, standardisation and homogenisation. Section 7 deals with The Tourist and Visitor Experience, emphasising the desire of tourists to be more

actively and interactively engaged in cultural tourism. This significant volume offers the reader a comprehensive synthesis of this field, conveying the latest thinking and research. The text is international in focus, encouraging dialogue across disciplinary boundaries and areas of study and will be an invaluable resource for all those with an interest in Cultural Tourism. This is essential reading for students, researchers and academics of Tourism as well as those of related studies in particular Cultural Studies, Leisure, Geography, Sociology, Politics and Economics.

*Cultural Heritage and Tourism in Japan* Springer Science & Business Media

This book is a fast-paced and thorough re-evaluation of what heritage tourism means to the people who experience it. It draws on contemporary thinking in human geography and heritage studies, and applies it to a sector of tourism that is both pervasive yet poorly researched in terms of the perspective of tourists themselves. In a series of lucid and tightly argued chapters, it traces the use of semiotics as an analytical tool from its theoretical origins in text, through the all-important dynamics of visibility into an expanded realm of feeling and sensuality. Challenging assumptions about the way that heritage is experienced, this book uses examples from around the world to explore the semiotic landscape that surrounds heritage sites, linking what is represented about the past and how it feels to be there.

*Understanding Urban Tourism* Bloomsbury Publishing

The Power of New Urban Tourism explores new forms of tourism in urban areas with their social, political, cultural, architectural and economic implications. By investigating various showcases of

New Urban Tourism within its social and spatial frames, the book offers insights into power relations and connections between tourism and cityscapes in various socio-spatial settings around the world. Contributors to the volume show how urban space has become a battleground between local residents and visitors, with changing perceptions of tourists as co-users of public and private urban spaces and as influencers of the local economies. This includes different roles of digital platforms as resources for access to the city and touristic opportunities as well as ways to organise and express protest or shifting representations of urban space. With contemporary cases from a wide disciplinary spectrum, the contributors investigate the power of New Urban Tourism in Africa, Asia, the Americas, Europe and Oceania. This focus allows a cross-cultural evaluation of New Urban Tourism and its dynamic, and changing conception transforming and subverting cities and tourism alike. The Power of New Urban Tourism will be of great interest to academics, researchers and students in the fields of cultural studies, sociology, the political sciences, economics, history, human geography, urban design and planning, architecture, ethnology and anthropology.

**Image of Istanbul, Impact of ECOC 2010 on the City Image**

BoD - Books on Demand

Istanbul "took the stage" as one of the three European Capital of Culture (ECOC) cities in 2010. In this spectacle, the urban spaces were projected as the theatre décor while residents and visitors became the spectators. The images of Istanbul pile up in videos and posters to show the city in every aspect in which everything becomes mishmash and the message gets lost in the chaos.

While Istanbul is depicted as a mystified city through Orientalist

representations, this image of Istanbul moves between the opposite ends of the contrasting pairs, and in contestation. "Culture, defined as making sense of the world (Hall, 1997: 2), is an integral part of branding a place, which involves cultural exchange (Anholt, 2005: 140). Mega-events may be used as forms of advertising for city marketing and branding, where the signification is not only about production of meaning but also staging of the meaning. The cities hosting mega-events can be turned into the protagonists of the spectacle by showcasing their cultural products as well as cultural being. Thus, what staged there are the city, its image as well as the events. The mega-events are helpful to spread the word about the city, but the meaning is created also through imaging the city and positioning this image in the minds of the people." CONTENT

Introduction  
Chapter 1: Understanding and dissecting the city image  
Chapter 2. Marketing the city and the city image  
Chapter 3. Istanbul: European Capital of Culture 2010  
Chapter 4. Posters of Istanbul 2010  
Chapter 5. Istanbul in between  
Conclusion  
*Critical Understandings of Place, Space and Experience* Routledge  
The digital turn in leisure has opened up a vast array of new opportunities to play, learn, participate and be entertained – opportunities that have transformed what we recognise as leisure. This edited collection provides a significant contribution to our changing understanding of digital leisure cultures, reflecting on the socio-historical context within which the digital age emerged, while engaging with new debates about the evolving and controversial role of digital platforms in contemporary leisure cultures. This book also demonstrates the interdisciplinary nature of studying digital leisure cultures. To

make sense of how individuals and institutions use digital spaces it is necessary to draw on history, science and technology, philosophy, cultural studies, sociology and geography, as well as sport and leisure studies. This important and timely study discusses both the promise of the digital sphere as a realm of liberation, and the darker side of the internet associated with control, surveillance, exclusion and dehumanisation. *Digital Leisure Cultures: Critical perspectives* is fascinating reading for any student or scholar of sociology, sport and leisure studies, geography or media studies.

*Tourism, Recreation, and Sustainability* Routledge

This book offers a comprehensive understanding of cultural heritage in Japan and its relationship with both domestic and international tourism. Japan has witnessed an increase in tourism, with rising visitor numbers to both established destinations and lesser known sites. This has generated greater attention towards various aspects of Japanese culture, heritage and society. This book explores these diverse aspects of everyday life in Japan and their interconnections with tourism. It begins with a conceptual framework of key theories related to heritage and tourism, serving as a useful apparatus for further discussions in the following chapters. Each chapter studies a specific aspect of Japan's cultural heritage, from the history of Japan, the development of war sites, such as Hiroshima and Nagasaki, to tourist destinations, indigenous communities and their places of residence, festivals such as matsuri, to popular culture and media. Each chapter discusses a certain type of cultural heritage first in a global context and then examines it in a Japanese context, aiming to demonstrate the relation between these two

different contexts. In each chapter, furthermore, how a particular kind of Japan's cultural heritage is utilised as tourism resources and how it is perceived and consumed by international and domestic tourists are discussed. Finally, the book revisits the conceptual framework to suggest future directions for cultural heritage and tourism in Japan. Written in an informative and accessible style, this book will be of interest to scholars, students and practitioners in the fields of tourism, cultural studies and heritage studies.

*Urban Assemblages* Springer Nature

*Tourism, Ethnic Diversity and the City* fills a gap in existing research in terms of how immigration relates to urban tourism and investigates the new theoretical insights and challenges for empirical research using informative case studies drawn from several advanced economies in Europe, North America and Australia. This enlightening book clearly explores the frontiers of knowledge on the interrelationship between tourism, migration, ethnic diversity and place. Exploring further the manifestations of ethnic diversity that have been commodified by immigrants in gateway cities, questioning how these expressions of culture can be transformed into vehicles for further developing the urban tourism economy. *Tourism, Ethnic Diversity and the City* presents a multidisciplinary approach drawing on key names from the field of geography, sociology, planning and political science and will appeal to those with an interest in any of these areas.

*Cultural Heritage and Tourism* Routledge

"One of the most salient forms of modern-day tourism is based on the heritage of humankind. The majority of all global travel entails some element of the cultural past, as hundreds of millions

of people visit cultural attractions, heritage festivals, and historic places each year. The book delves into this vast form of tourism by providing a comprehensive examination of its issues, current debates, concepts and practices. It looks at the social, physical and economic impacts, which cause destinations, site managers and interpreters to consider not only how to plan and manage resources but also how to portray the past in ways that are acceptable, accurate, accessible and politically relevant. In the process, however, the depth of heritage politics, the authenticity and inauthenticity of place and experience, and the urgent need to protect living and built cultures are exposed. The book explores these and many other current issues surrounding the management of cultural resources for tourism. In order to help students relate concepts to real-world situations it combines theory and practice, is student learning oriented, is written accessibly for all readers and is empirically rich."--Pub. website. *Social Movements and Public Policies in Southern European Cities* Routledge

Exploring the connection between tourism and violence, this book draws on a range of disciplinary approaches, including social anthropology, cultural geography, sociology, and tourism studies. Ideas and concepts of violence have long been explored in the social sciences literature but in relation to tourism studies specifically the concept has rarely been problematised. Drawing on a range of case studies this book demonstrates the relationship between tourism and violence both in its overt physical form and in the social structures and symbolic landscapes that underpin touristic activity. *Tourism and Violence* offers a timely intervention in this field by bringing together, for

the first time, work by scholars who, in their different ways, are engaging with the concept of violence within touristic settings and practices. This unique book paves the way for future research that will probe further the intersections between violence and tourism.

The Visitor Experience of Architecture, Urban Spaces and City Attractions Channel View Publications

Despite the formidable growth of urban tourism there has been little of the critical engagement that one would expect from the social sciences: the rich potential of contemporary social science for urban tourism has yet to be realized. Martin Selby's textbook makes available to practitioners and students seeking to understand the phenomenon of tourism in towns and cities the methods and concepts that are currently enhancing and transforming our understanding of society in other areas of the social sciences. With an emphasis on image, culture and experience, the author draws upon the "cultural turn" to explain the human aspects of the urban tourism phenomenon. The discussions emphasize the significance of urban tourism within debates upon the contemporary city, postmodernity and the pursuit of social science. Clearly written, with case studies and further reading, this book should be welcomed by students and lecturers in geography, tourism, planning and sociology.

*An Introduction* Springer

Tourism and Urban Regeneration: Processes Compressed in Time and Space presents the global phenomenon of tourism and urban regeneration through the contemporary frames of spatial planning theory, metagovernance, resilience and disaster capitalism. Drawing upon cases from several cities around the

globe, the book advances the field with the inclusion of examples from post-disaster rebuilding and recovery. The book is rooted in a theoretical framework that considers time, space and tourism as core facets for the analysis. By doing so, it provides readers with an understanding of different yet similar processes of urban development and identifies the principles for tourism and urban regeneration to effectively contribute to socio-economic growth, urban change and long-term sustainability. The theory is illustrated through insightful case studies covering a range of urban tourism destinations including Dubai, Newcastle, Christchurch, Pittsburgh, Detroit and Taipei. This work will be of great interest to upper-level students and researchers in Tourism as well as those in the fields of Geography, Urban Planning, and Policy and Development.

Springer Nature

This book examines the impacts of tourism-led transformations on the industrial historical waterfront at Darling Harbour and The Rocks in Sydney, Australia in the context of urban restructuring and deindustrialisation. The book also offers an extended reflection on the paradoxes between tourism and heritage. This discussion is not a new concept. However, this book critically explores the significance of the industrial heritage assets of these areas and the implications of the transformation procedures. Although Darling Harbour and The Rocks have generally been considered success stories of transformation with mixed touristic, recreational, residential and commercial activities, this book examines and evaluates how industrial history and heritage values have been affected. It demonstrates that tourism/leisure-led developments create urban landscapes in which cultural

identity and historical assets are sacrificed and/or reinvented.

Tourism and Visual Culture Methods and cases CABI

A long neglected concept in the field of international relations and political theory, hospitality provides a new framework for analysing many of the challenges in world politics today, from the search for peaceable relations between states to asylum and refugee crises.

Urban Tourism in China Walter de Gruyter GmbH & Co KG

Over the last decade, commentaries and research on urban tourism precincts have predominantly focused on: their role in the tourism attractions mix; their physical and functional forms; their economic significance; their role as a catalyst for urban renewal; their evolution and associated development processes; and, perhaps more broadly, their role, locality and function within the context of urban planning. *City Spaces - Tourist Places* both consolidates and develops the extant knowledge of urban tourism precincts into a coherent research driven contemporary work. It revisits and examines the foundational literature but, more importantly, engages with aspects of precinct development that have previously been either underdeveloped or received only limited consideration, such as the psychological and socio-cultural dimensions of the precinct experience. Written by an international team of contributors it provides the reader with: \* A comprehensive analysis of foundational theory and cutting-edge advances in the knowledge of the precinct phenomenon \* An examination of previously underdeveloped topics and themes based on contemporary and ground-breaking research \*

Typological and theoretical frameworks in which to locate precinct form, function and experience Brilliantly edited to ensure theoretical continuity and coherence *City Spaces - Tourist Places* is vital reading for anyone involved in the study or planning of urban tourism precincts.

*Cultural Tourism Research Methods* Bloomsbury Publishing

This book explores the phenomena of the urban everyday and new urban tourism. It provides a systematic framework and draws on a mix of theoretical and empirical work to look at the increasing intermingling of 'tourists' and 'residents'. Tourism and urban everyday life are deeply connected in a mutually constitutive way. Tourism has become a key momentum of urban development and affects cities beyond its economic dimension. Urban everyday life itself can turn into a matter of tourist interest for people searching for experiences off the beaten track. Even living in a city as a resident involves moments, activities and practices which could be labelled as 'touristic'. These observations demonstrate some of the various layers in which urban tourism and everyday city life are intertwined. This book gathers multiple interdisciplinary approaches, a diversity of topics and methodological variety to examine this complex relationship. It presents a systematic framework for the dynamic research field of new urban tourism along three dimensions: the extraordinary mundane, encounters and contact zones, and urban co-production. This book will be of interest to students and researchers across fields such as Tourism and Mobility Studies, Urban Studies, Leisure Studies, Tourism Geography, and Tourism Sociology.
