 Galbraith
 redefined
 America's
 perception of
 itself in The

New Industrial
 State, one of
 his landmark
 works. The
 United States
 is no longer a
 free-
 enterprise
 society,
 Galbraith
 argues, but a

<p>structured state controlled by the largest companies. Advertising is the means by which these companies manage demand and create consumer "need" where none previously existed. Multinational corporations are the continuation of this power system on an international level. The goal of these companies is not the betterment of society, but immortality through an</p>	<p>uninterrupted stream of earnings. bulging with a year-round supply of perfectly round, bright red-orange tomatoes have become all but a national birthright. But in Tomatoland, which is based on his James Beard Award-winning article, "The Price of Tomatoes," investigative food journalist Barry Estabrook reveals the huge human and environmental cost of the \$5 billion fresh tomato industry.

Fields are sprayed with more than one hundred different herbicides and pesticides. Tomatoes are picked hard and green and artificially gassed until their skins acquire a marketable hue. Modern plant breeding has tripled yields, but has also produced fruits with dramatically reduced amounts of calcium, vitamin A, and vitamin C, and tomatoes that have fourteen times more sodium than the tomatoes

our parents enjoyed. The relentless drive for low costs has fostered a thriving modern-day slave trade in the United States. How have we come to this point? Estabrook traces the supermarket tomato from its birthplace in the deserts of Peru to the impoverished town of Immokalee, Florida, a.k.a. the tomato capital of the United States. He visits the laboratories of seedsmen trying to develop

varieties that can withstand the rigors of agribusiness and still taste like a garden tomato, and then moves on to commercial growers who operate on tens of thousands of acres, and eventually to a hillside field in Pennsylvania, where he meets an obsessed farmer who produces delectable tomatoes for the nation's top restaurants. Throughout Tomatoland, Estabrook

presents a who's who cast of characters in the tomato industry: the avuncular octogenarian whose conglomerate grows one out of every eight tomatoes eaten in the United States; the ex-Marine who heads the group that dictates the size, color, and shape of every tomato shipped out of Florida; the U.S. attorney who has doggedly prosecuted human traffickers for the past decade; and

the Guatemalan peasant who came north to earn money for his parents' medical bills and found himself enslaved for two years. Tomatoland reads like a suspenseful whodunit as well as an expose of today's agribusiness systems and the price we pay as a society when we take taste and thought out of our food purchases.
