 This book features selected research papers presented at the International Conference on Evolutionary Computing and Mobile Sustainable Networks (ICECMSN 2020), held at the Sir M. Visvesvaraya Institute of Technology on 20–21 February 2020. Discussing advances in evolutionary computing technologies, including swarm intelligence algorithms and other evolutionary algorithm paradigms which are emerging as widely accepted descriptors for mobile sustainable networks virtualization, optimization and automation, this book is a valuable resource for researchers in the field of evolutionary computing and mobile sustainable networks.

 A Biography Of Bajaj Who Has Close Links With Gandhi. It This Illuminates Certain Facets Of Gandhi`S Personality And Ideas Which Have Been Ignored In Other Narratives.
Dairy Cooperatives London : Richard Ivey School of Business, University of Western Ontario
 William J. Bernstein promises to lay out an investment strategy that any seven year old could understand and will take just 15 minutes of work per year. He also promises it will beat 90% of finance professionals in the long run, but still make you a millionaire over time. Bernstein is addressing young Americans just embarking on their working careers. Bernstein advocates saving 15% of one's salary starting no later than age 25 into tax-sheltered savings plans (IRA or 401(k) in the U.S., RRSPs or Registered Pension Plans in Canada), and divvying up the money into just three mutual funds: a U.S. total stock market index fund, an international stock market index fund and a U.S. total bond market index fund. For millennials, saving 15% of salary is the financial equivalent of dying, which is why Bernstein titles his document 'If you can.'
Regional Integration and Economic Development in South Asia Newnes

Includes a variety of research methods both quantitative and qualitative. * Hands-on activities help readers experience human geography as an active, practical field of study and application.
50 Camels and She's Yours Springer
 This book examines the dynamics of infrastructure development in Northeast India, especially Manipur, from a socio-anthropological perspective. It looks at the pattern and distribution of infrastructure in the region to analyse the impact of education, roads and health care on the livelihoods, ecosystems, governance and social futures of communities. The volume examines the infrastructure deficit in the conflict-ridden state of Manipur, focusing especially on electricity and roads. The author shows how problems arising from poor infrastructure are further complicated on account of corruption, insurgency, ethnic unrest and the politics of marginalisation. Looking at the discourse around development in the northeast, the volume also highlights the structural inequality in Manipur and other states. It further shows how infrastructure development can become a means for enabling trade, creating markets, diluting boundaries between varied ethnic groups and connecting people. This book will be useful for researchers and scholars of development studies, economics, social anthropology, sociology and public policy – particularly those interested in India's northeast.

 The book presents high-quality research papers from the Seventh International Conference on Solid Waste Management (IconSWM 2017), held at Professor Jayashankar Telangana State Agricultural University, Hyderabad on December 15–17, 2017. The conference, an official side event of the high-level Intergovernmental Eighth Regional 3R Forum in Asia and the Pacific, aimed to generate scientific inputs into the policy consultation of the Forum co-organized by the UNCRD/UNDESA, MoEFCC India, MOUD India and MOEJ, Japan. Presenting research on solid waste management from more than 30 countries, the book is divided into three volumes and addresses various issues related to innovation and implementation in sustainable waste management, segregation, collection, transportation of waste, treatment technology, policy and strategies, energy recovery, life cycle analysis, climate change, research and business opportunities.
A Glimpse of Eternal Snows Academic Press
 In the mid-1990s, civil war and genocide ravaged Rwanda. Since then, the country's new leadership has undertaken a highly ambitious effort to refashion Rwanda's politics, economy, and society, and the country's accomplishments have garnered widespread praise. Remaking Rwanda is the first book to examine Rwanda's remarkable post-genocide recovery in a comprehensive and critical fashion. By paying close attention to memory politics, human rights, justice, foreign relations, land use, education, and other key social institutions and practices, this volume raises serious concerns about the depth and durability of the country's reconstruction. Edited by Scott Straus and Lars Waldorf, Remaking Rwanda brings together experienced scholars and human rights professionals to offer a nuanced, historically informed picture of post-genocide Rwanda—one that reveals powerful continuities with the nation's past and raises profound

questions about its future. Best Special Interest Books, selected by the American Association of School Librarians Best Special Interest Books, selected by the Public Library Reviewers
India's Money Monarchs Bradt Travel Guides
 Set against the backdrop of one of the most colorful countries in the world, A Glimpse of Eternal Snows is an inspiring story of courage, love and a family's determination to give their child the best life possible. In pulsating, polluted Kathmandu and an idyllic village on a river island at the foot of the Himalayas, 'Doctor Jane' and her engineer husband Simon hope to make a difference: Jane to fulfil her vision to heal and advocate for the poor, Simon to avert the floods that threaten to devastate the land every monsoon season. The Nepali people are accepting of whatever fate flings at them and here the family find sanity, compassion and joy with baby David, who in England was little more than an 'interesting case'. This is a tale of Himalayan highs and monsoon lows, of cultural complexities, unexpected wildlife and rugged terrain, of vivid color, superstition and spicy smells.

 Stimuli Responsive Polymeric Membranes: Smart Polymeric Membranes explains the fundamentals and advances in topics relating to the field of membrane science. It elaborately explains concepts relating to stimuli responsive membranes, with special importance given down to minute details. Material selection, preparation, characterization and applications of various stimuli responsive membranes are extensively addressed, and their relevance (including examples) is included. The book covers history and development, merits and demerits, mechanisms of transport and fouling, applicability of membranes to various diverse areas, and preparation and characterization techniques of membranes. Next, the concept of fouling and its remedial actions is discussed. Finally, promising fields of research in the membrane science and future perspectives of membrane science field are explored. - Provides basic and advanced knowledge of smart membranes, considering their morphological, physicochemical and separation characteristics - Written in a clear and lucid style, keeping a diverse audience in mind - Based on the state-of-art research of the authors
Competing with Giants : Survival Strategies for Emerging Market Companies Springer
 A radical shift is underway in global value chains as they increasingly move beyond traditional manufacturing processes to services and other intangible assets. Digitization is a leading factor in this transformation, which is being accelerated by the coronavirus disease (COVID-19) pandemic. The Global Value Chain Development Report, the third of a biennial series, explores this shift beyond production. The report shows how the rise of services value chains offers a new path to development and how protectionism and geopolitical tensions, environmental risks, and pandemics are undermining the stability of global value chains and forcing their reorganization geographically. It is co-published by the WTO, the Asian Development Bank, the Research Institute for Global Value Chains at the University of International Business and Economics, the Institute of Developing Economies, and the China Development Research Foundation.
Child Life Beyond the Hospital Lulu.com

A new book by the author of *A is for Activist* is a rhyming, boldly illustrated vision of a better world. When you go to a march And raise your sign high You'll make people smile who thought you were shy And you'll make people wonder, does that kid really know why? You DO know of course That's why you are there You're there to say STOP! What's happening's not fair Then they say, we know what you're against End poverty stop war... But okay then what are you for? Oh! What are we for! That's my favorite question And I'm sure it's yours too Because you pay attention You have so many answers And so many options And so many solutions that you want to impart The only hard question is where does one start? Oh, *The Things We're For!* is a celebration of the better world that is not only possible, but is here today if we choose it. Today's kids are well aware of the many challenges that they face in a world they are inheriting, from climate change to police violence, crowded classrooms to healthcare. Poetically written and beautifully illustrated in Innosanto Nagara's (*A is for Activist*) signature style, this book offers a vision of where we

could go--and a future worth fighting for. Oh, *The Things We're For!* is a book for kids, and for the young at heart of all ages. [Human Geography in Action](#) The Indigo Book
The intent of this book is to highlight the ways that child life practice can be delivered in a variety of settings, and to provide readers with a starting point for exploring the endless opportunities open to child life specialists.

It constitutes the refereed proceedings of the 4th Asian Supercomputing Conference, SCFA 2018, held in Singapore in March 2018. Supercomputing Frontiers will be rebranded as Supercomputing Frontiers Asia (SCFA), which serves as the

technical programme for SCA18. The technical programme for SCA18 consists of four tracks: Application, Algorithms & Libraries Programming System Software Architecture, Network/Communications & Management Data, Storage & Visualisation The 20 papers presented in this volume were carefully reviewed and selected from 60 submissions.

[To a Gandhian Capitalist](#) Taylor & Francis

This anthology is aimed at travellers of all styles: arm-chair, wishful thinkers and adventurers alike. It is particularly aimed at women who think, 'Oh, I wish I could do that!' Come with us and be inspired by the extraordinary journeys of five ordinary women: two medical doctors, a teacher, an accountant and a psychoanalyst as they travel the five continents.

Global Value Chain Development Report 2021 Oxford University Press, USA

South Asian leaders have made it a priority to tackle key regional issues such as poverty, environment degradation, trade and investment barriers and food insecurity, among others.
