### **India Towards 100: a Call for Reset?** IJOPEC PUBLICATION

The 1990 CIA World Factbook is a work by the Central Intelligence Agency. The CIA is a civilian foreign information service of the U.S. Government, assigned with collecting, managing and evaluating national security data from around the world, mainly through the use of human intelligence.  
Values in Global Administrative Law Edward Elgar Publishing  
South Africa still faces low economic growth and high unemployment, coupled with the persistent challenges of poverty and inequality. These exert pressure on South Africa to foster structural transformation that will facilitate a more inclusive and

resilient economy. Authors apply multiple theoretical and empirical perspectives to take stock of the historical and contemporary structure of the South African economy, its evolving nature and possible future pathways. The explore how South Africa's structural transformation agenda is affected by the global context, and discuss debates on the extreme social impacts of globalised and financialised economic structures. Contributors offer technical and analytical discussions of the overlapping structural faultlines that produce uneven economic performance. They explain the changes and continuities of South Africa's economic structure, bound by an analytical thread that centres power relations and political settlements. Varied chapters explain how poor governance and corruption have slowed down structural reform. This has been further exacerbated by the inconsistent availability of energy and the deterioration of

logistics. The book details the structural reforms and policy regimes necessary for increasing productive capacity in South Africa's agriculture, manufacturing, agro-processing, retail and services, energy and mining industries. It also reflects on the role that micro- and informal enterprises can play if afforded the necessary support. The technical details and analyses in the book highlight the need for a radical review of macroeconomic policy to reduce the country's chronic vulnerability to poverty and inequality.

**Theoretical and Applied Mathematics in International Business** Frontiers Media SA

This book examines the changing image of the Arab Gulf States in the West. It addresses the question of perception in international relations and how the Arab States of the Gulf have pursued various endeavors to project themselves into Western imagination. The book chapters generate ideas on how perceptions came about and ways to improve cultural and political realities on the ground in the Arab Gulf States. Thus, it paves the way for a new area of research in the field of Gulf Studies that extends beyond traditional international relations frameworks by weaving elements of intercultural communication into the mix. Recognizing, yet extending beyond, a traditionally realist framework, which has dominated the analysis of Arab Gulf States' foreign relations with western countries, this book tackles both the materialist and the symbolic in the efforts and initiatives launched by the Arab Gulf States. Some chapters maintain a social-scientific approach about the politics of the Arab Gulf States in the West from an international relations lens. Others employ theoretical frameworks that were founded on the notion

of the "encounter," with anthropological lenses and concepts of intercultural communication. In addition to the value of this academic research agenda, as such, some of the chapters also touch upon the added importance of policy-oriented input. As the Arab Gulf States actively engage with the West, the book would widely appeal to students and researchers of Gulf politics and international relations.

10 Years After the Great Recession: Orthodox versus Heterodox Economics Oxford University Press

This book looks at how sport and sports organisations have had to innovate during the COVID-19 pandemic. Against a backdrop of lockdowns, empty stadia and a fast-moving public health crisis, the book presents fascinating case studies of innovation and crisis management in sport, with valuable lessons to be learned for preparedness and resilience in future crises. The book explores how managerial processes have evolved during the pandemic in areas as diverse as sports communication, youth sport, sports events, esports, sports tourism, and physical activity, in both professional and community settings. It considers the fundamental importance of technology as a tool of innovation, and considers how different stakeholder groups, from governing bodies to athletes to fans, have developed new pathways of engagement and what that might mean for the future development of the sport industry. This book is fascinating reading for any student, researcher, practitioner or policy maker looking to better understand this profound moment in the history of sport and society, and to anybody with an interest in key themes in sport business and management, such as innovation, crisis management or consumer behaviour.

The 1995 CIA World Factbook Springer Nature

Who Matters at the World Bank explores "who matters" in a 32-year history (1980-2012) of policy change within the World Bank's public sector management and public sector governance agenda, and is anchored within the public administration discipline and its understanding of bureaucracy, bureaucratic politics, and stakeholder influences. In response to constructivist scholars' concerns about politics and the organizational culture of international civil servants within international organizations, Kim Moloney uses stakeholder theory and a bureaucratic politics approach to suggest the normality of politics, policy debate, and policy evolution. The book also highlights how for 21 of those 32 years it was not external stakeholders but the international civil servants of the World Bank who most influenced, led, developed, and institutionalized this sector's agenda. In so doing, the book explains how one sector of the Bank's work rose, against the odds, from being included in just under 3% of approved projects in 1980 to 73% of all projects approved between 1991 and 2012.

**INDIAN MODELS OF ECONOMY, BUSINESS AND MANAGEMENT** Xlibris Corporation

Even after achieving the status of a developed economy, many economies face other challenges which may include economic stagnation and income inequality. The book looks at how a mature economy can continue to weather challenges and how the growth of living standards will depend on productivity growth through Singapore's experience. After Singapore's rapid economic transformation, the nation is at a crossroads. The book explains how productivity growth in turn depends on technological diffusion from abroad as well as indigenous

innovation. It also examines how the design of policy to develop indigenous innovation to promote economic dynamism may come with creative destruction and disruptive effects on jobs and wages. The Singapore Economy provides insight into how we can maintain social cohesion and establish a political equilibrium that embraces the new sources of growth through policy formulation for economic inclusion.

*Peripheral Visions / Global Sounds* Bloomsbury Publishing

This book examines the global sports ecosystem through three of its central pillars: Sport marketing, sports equipment manufacture and sales, and sport governance and organization. By focusing on these three themes, the book presents a nuanced and multi-faceted view of how the global sports economy works and what its main strategic challenges and opportunities are. Offering a balance between theory and practice, and adopting an international perspective with case studies and examples from the Americas, Europe and Asia, the book addresses key issues such as corporate social responsibility, the impact of culture on international sport business, innovation and entrepreneurship, and consumer behaviour. The Global Sport Economy is fascinating reading for students, researchers and practitioners with an interest in sport business and management, sport marketing, the sporting goods industry and distribution and sport governance.

Modern Global Economic System: Evolutional Development vs. Revolutionary Leap Liverpool University Press

This comparative study of industrial capitalism is an examination of state-economy relations in mixed economies ranging from the interventionist German and Japanese to the less interventionist

Anglo-American. Following the postwar consensus that resulted in the 'golden age' (1950-1973) and ended with the energy crisis, the Anglo-American economies adopted neoliberalism while Germany and Japan remained interventionist. This resulted in the emergence of national types of capitalism. While analyzing the increased competition between them, R.C.Mascarenhas also notes the influence of globalization as well as 'alternative capitalism' with the survival and re-emergence of industrial districts.

Sport Management, Innovation and the COVID-19 Crisis Good Press

This book highlights key results and lessons learnt from two field sites, La Suerte in Costa Rica and Ometepe Nicaragua. It provides long term data on species abundance and distribution. Primates receive specific attention in this book, as they are flagship species and good indicators for the "health" of an ecosystem, but as well a money maker. Many primate species are sensitive to habitat alteration, and are often hunted out first. But they play an important role as seed dispersal agents for the regeneration of the forest. The book then compares results from the two field sites with regional trends, and explores potential solutions such as REDD+. This book strongly calls for new approaches in conservation, it makes the case for looking beyond the pure species biology and classic conservation angle and to take into account the economic and political realities.

Who Matters at the World Bank? Good Press

"This book provides a comprehensive, integrative, and global assessment of the e-government evolution in terms of real-life success and failure cases"--Provided by publisher.

Indian Models of Economy, Business and Management Shanlax Publications

Lex Petrolea and International Investment Law: Law and Practice in the Persian Gulf offers readers a detailed analysis of jurisprudence on the settlement of upstream petroleum disputes between host states in the Persian Gulf and foreign investors. Dr Nima Mersadi Tabari considers the historical, political, and socio-economic roots of the existing frameworks and levels of protection offered to foreign investors. With particular focus on petroleum-related disputes, he initially delivers a comprehensive survey of the jurisprudence of international investment law and investment treaty arbitration. Following on from this, in three dedicated chapters, the author provides in-depth analysis of the legal regimes governing the matter in the major producers of the region: Saudi Arabia, Iraq, and Iran. A key resource for all professionals working on legal issues arising from foreign direct investments in natural resources, this book draws a detailed picture of the legal regime governing the upstream sector in the most important geographical region for the international oil and gas sector.

HRM, Artificial Intelligence and the Future of Work Taylor & Francis

This proceedings book reflects the alternative way of development of the modern global economic system. It sets evolutionary development in opposition to revolutionary leap. The search for the best way to develop the world economy in the present and future is carried out. The social environment and the human-centered development of the modern global economic system have been explored. The features of training of personnel

for the modern global economic system through the development of vocational education and training have been studied. Sustainable development, energy and food security have been identified as significant milestones of the progress of the modern global economic system. Innovations and digital technologies have been suggested as the drivers of growth and development of the modern global economic system. Consideration has been given to the institutional framework and legal groundwork for the development of the modern global economic system. The fundamentals have been identified and recommendations have been put forward for improving governmental regulation, financial and capital investment support for integration in the modern global economic system. The book includes the best works based on the results of the 22nd International Research-to-Practice Conference “Current Issues of the Global Economy” which was held on June 19, 2020, at the Peoples’ Friendship University of Russia (PFUR) (Moscow, Russia) and the 14th National Research-to-Practice Conference “A New Paradigm of Social and Economic Development in the Age of Intelligent Machines,” which was held on May 14–16, 2020 (Nizhny Novgorod, Russia), VIII International Research-to-Practice Conference “Multipolar Globalization and Russia,” which was held on May 21–23, 2020 (Rostov-on-Don, Russia), III All-Russian Research-to-Practice Conference “Power, Business, and Education: The Ascent to Man,” which was held on May 21–22, 2020 (Krasnoyarsk, Russia), International Research-to-Practice Conference “Current Issues and Ways of Industrial Development: Engineering and Technologies,” which was held from September 28, 2020, till October 1, 2020 (Komsomolsk-on-Amur), and the

15th National Research-to-Practice Conference “New Models of Behavior of Market Players in the Conditions of Digital Economy,” which was held on October 29–30, 2020, at Ufa State Oil Technical University, Institute of Economics and Service (Ufa, Russia). The target audience of the book consists of scholars studying the features of development of the global economic system at the present stage and the prospects for its future progress.

#### **The Singapore Economy** Allied Publishers

This book examines the new geopolitical economy of football, exploring the intersection of money, politics, and power in the world’s most popular sport. Against a background of international conflict and the emergence of powerful new state actors in world sport, the book considers how football investments and events have become instruments of soft power and industrial development, and how football plays an increasingly significant role in global politics and international relations. Featuring the work of leading researchers from around the world, and case studies from five continents, the book examines key contemporary issues such as the Gulf States’ interests in European soccer and debates around ‘sportwashing’ and human rights, the global politics of artificial intelligence (AI) in football, and football’s complex relationship with migration and identity in Africa and Latin America. It considers the seismic impact of Russia’s invasion of Ukraine on the geopolitics of football; on the shifting landscape of the governance of football in Europe; the rise of Major League Soccer and the ‘Messi effect’, and how the development of China and India into global economic superpowers is reflected in their vision for their domestic football

leagues. The book also considers the importance of Fédération Internationale de Football Association (FIFA) and their commercial partners and stakeholders as geopolitical actors on the world stage. This is a fascinating read for anybody with an interest in sport, political economy, international politics, globalisation, or development.

*The Geopolitical Economy of Sport* Xlibris Corporation

This book contains the collection of articles from the International Conference on "Commerce and Management in the Digital Age: Trends, Challenges & Innovation" held on January 5th and 6th, 2024. This distinguished event was meticulously organized by the School of Commerce at The American College, Madurai, Tamil Nadu, India.

Global population aging - health care, social and economic consequences, volume II PHI Learning Pvt. Ltd.

Theoretically and empirically informed studies on the role and efficiency of the public sector, public wage and employment policy, privatization, tax policy, and fiscal sustainability. The public sector has grown substantially in the last fifty years. In the euro area, for example, total government expenditures have been around fifty percent of GDP since the early 2000s, resulting in a growing tax burden or high public debt or both. At the same time, government had intervened in all aspects of economic life, from the provision of public goods and services to product and labor market regulation. Research shows that the effect of government size on economic performance is positive in countries where the public sector is efficient but negative in countries where it is inefficient. In this book, experts from academe and central banking discuss reforms that would make

the public sector more efficient and/or more equitable. After a rich review of the public sector reform policy agenda, with particular attention to the role of the public sector and how to improve the provision of public goods and services, the contributors offer theoretically and empirically informed perspectives on some specific policy topics. These include public wage and employment policy, the role of international institutions such as the World Bank in promoting public sector reforms, the optimal mix of tax policy, the measurement of public sector efficiency, and the study of fiscal sustainability. The contributors relate these topics to such deeper issues as individual incentives as well as to policy debates over privatization, and austerity. Contributors Konstantinos Angelopoulos, Stylianos Asimakopoulos, Danilo Ballanti, Roberto A. De Santis, Roberto Dispotico, George Economides, Pedro Gomes, Gabriella Legrenzi, James Malley, Costas Milas, Ilaria Petrarca, Apostolis Philippopoulos, Francesco Porcelli, Roberto Ricciuti, Lodewijk Smets, Peter Birch Sørensen, Petros Varthalitis, Francesco Vidoli

**Routledge Handbook of Football Marketing** PHI Learning Pvt. Ltd.

Entrepreneurship and Innovation are the key drivers for generating wealth from knowledge. The readings of this book will indisputably enrich the knowledge on phase of Creative and Innovative Entrepreneurship in India.

**The 1990 CIA World Factbook** Pan Macmillan South africa  
This comprehensive and extensively researched study deals primarily with the economic, business and management models from the Indian perspectives. The third edition of the book presents updated details, latest data and new information

obtained from authentic sources in order to understand the topics discussed. It provides detailed information collected from field studies undertaken in different industrial and business centres across the country. The details contained in the book have been obtained from various empirical and research studies and reputed national and international sources. The author contends that India remained a strong economic, business and management power for most of the time in history, and the country has the potential to achieve the premier status even today. He gives masterly analysis of not only the Indian economic, business and management models, but also the popular economic, business and management models of the other countries. The author asserts that a paradigm shift in thinking is urgently needed to understand the ground realities and the functioning Indian systems, so that the country could be taken forward with the necessary orientation and suitable policies. Intended primarily for the postgraduate students of Management, the book would also be useful to the students of Economics and Commerce, as well as to the professionals interested in the study of the Indian economy, business and management from the Indian perspectives. **KEY FEATURES :** A unique presentation of the Indian economic environment and its functioning models since the ancient periods. Comparative study of the Eastern and Western business models giving a holistic view of the subject. Historical development of the Indian management systems and the Western theories with details of contemporary management practices. Text reinforced with plenty of data to validate the concepts and a large number of examples and case studies to illustrate the concepts discussed. Updated with the

latest data, recent developments and new information. *International Conference on Commerce and Management in the Digital Age: Trends, Challenges & Innovations* Routledge  
New edition with updated content In a world shaped by Covid-19 and characterised by fake news, manipulated feeds of information and divisive social-media agendas, it's easy to believe that our time is the most challenging in human history. It's just not true. It is a time of extraordinary opportunity. But only if you have the right mindset and attitude. Fear of the future breeds inaction and leads to strategic paralysis. Problem-solvers thrive in chaotic and uncertain times because they act to change their future. Winners recognise that in a world of growing uncertainty, you need to resort to actions on things you can control. A robust mindset is the one common characteristic Bruce Whitfield has identified in two decades of interrogating how South Africa's billionaires and start-up mavericks think differently. They don't ignore risk or hope that problems will go away. They constantly measure, manage, consider and weigh up opportunities in a tumultuous sea of uncertainty and find ways around obstacles. If, as Nobel Prize-winning economist Robert Shiller suggests, the stories we tell affect economic outcomes, then we need to tell different stories amidst the noise and haste of a rapidly evolving world.

*Pacific Seabirds* Springer

This book features selected papers presented at Second International Conference on International Conference on Information Management & Machine Intelligence (ICIMMI 2020) held at Poornima Institute of Engineering & Technology, Jaipur, Rajasthan, India during 24 - 25 July 2020. It covers a range of

topics, including data analytics; AI; machine and deep learning; information management, security, processing techniques and interpretation; applications of artificial intelligence in soft computing and pattern recognition; cloud-based applications for machine learning; application of IoT in power distribution systems; as well as wireless sensor networks and adaptive wireless communication.

**Institutional Case Studies on Necessity Entrepreneurship**  
Routledge

This is the first book to define and explore the geopolitical economy of sport – the intersection of power, politics, money, and state interests that both exploit and shape elite sport around the world. Russia’s invasion of Ukraine, the global response, and the consequent ramifications for sport have put the geopolitical economy of sport front and centre in both public debate and academic thinking. Similarly, the Winter Olympics in Beijing and the FIFA World Cup in Qatar illustrate the political, economic, and

geographic imperatives that shape modern sport. This book brings together studies from around the world to describe this new geopolitical economy of sport, from the way in which countries use natural resource revenues, accusations of sport washing, and the deployment of sport for soft power purposes, to the way in which sport has become a focus for industrial development. This book looks at the geopolitical economy of sport across the globe, from the Gulf States’ interests in European soccer to Israel seeking to build a national competitive advantage by positioning itself as a global sports tech start-up hub, and the United States continuing to extend its economic and cultural influence through geopolitical sport activities in Africa, Latin America, and the Indian subcontinent. This book captures a pivotal moment in the history of sport and sport business. This is essential reading for any student, researcher, practitioner, or policymaker with an interest in sport business, the politics of sport, geopolitics, soft power, diplomacy, international relations, or international political economy.
