Ecosystems: What They
Are 2.1 Notes I.
Ecosystems: A Description*

A. General vocabulary 1)
biota = biotic
community—plants,
animals, and microbes of
an area 2) biosphere—all
species on Earth and their
ecosystems 3)
ecology—the study of
ecosystems and the
interactions within
them APES CHAPTER 2
NOTES Ecosystems: What
They Are 2.1 Notes
...Chapter 2: Ecosystems:

What They Are 2.1 What
Are Ecosystems? The
grouping or assemblage
of plants, animals, and
microbes we observe
when we study a natural
forest, a grassland, a
pond, a coral reef, or
some other undisturbed
area is referred to as the
area's biota or biotic
community. apes chapter

 APES : By Raymond
 P.APES Exam. Chapter 2:
 The Living World. A.
 Ecological Structure.

Ecosystems are made up
 of populations and
 communities; Populations
 are groups of organisms
 of the same species in a
 specific area;
 Communities are groups
 of populations; An
 ecological niche is the
 way of life or role of a
 species in an
 ecosystem;Chapter 2: The

Unclear ecosystem boundaries A. general terms 1) biota = biotic community—plants, animals, and microbes of an area 2) biosphere—all species on Earth and their ecosystems APES CHAPTER 3 NOTES (MRS. BAUCK): ECOSYSTEM ECOLOGY ... Plants that

are adapted to aquatic ecosystems and environments. 20. Halophytes-A plant that is grown in water with high salinity. Critical Thinking Read, analyze, and give complete answers to these questions. 1. What are the three important benefits (ecosystem service) provided by wetlands? Limit the effects of waves; Convey and store floodwatersAquatic Ecosystems Study Guide - APES : By Reymond P.Notes. scrAPES. LABS Ecosystems on the Brink

By Carl Zimmer. List the major ideas, concepts or key points- point by point: In July 2008 a group of scientists and graduate students led by ecologist ... Once these ecosystems are thrown off, it is extremely difficult to get them back in track.Ecosystems on the Brink - AP ENVIRONMENTAL SCIENCE2: How does the story exemplify how humans (in our attempt to fix one thing), cause unforeseeable problems in ecosystems? -The scientists caused

unforeseeable problems in the ecosystems because when they sprayed the DDT to kill the mosquitoes, but they did not realize how that would effect all of the other organisms on the higher levels of the trophic pyramid.Borneo Story - Brandon Munoz APESThey also disrupted the ecosystems by bringing invasive species into the webs. It was concluded that changes in predators also had bigger changes in the food webs. - Removing or reducing the populations of the apex

predators in the food chains causes the lower-level species to increase in population, damaging the ecosystem because there is nothing to control their populations. Ecosystems On The Brink Article - Brandon Munoz APES The Omnivore's Dilemma- Chapter #5; The Rise of renewable energy; APES Study Guide- Aquatic Ecosystems Vocabulary Understand and be able to apply each of these terms. 1. Salinity - Salinity is the taste experience when common salt is

taken into the mouth. 2. Aquatic Ecosystems - Introduction to APES 2. Plankton - A ny organisms that live in the water column and are incapable of swimming against a current. 3. Nekton - R efers to the aggregate of actively swimming aquatic organisms in a body of water (usually oceans or lakes) able to move independently of water currents. 4.
