Dealing with all aspects of risk management that have undergone significant innovation in recent years, this book aims at being a reference work in its field.

Different to other books on the topic, it

addresses the challenges and opportunities facing the different risk management types in banks, insurance companies, and the corporate sector. Due to the rising volatility in the financial markets as well as political and operational risks affecting the business sector in general, capital adequacy rules are equally important for non-financial companies. For the banking sector, the book emphasizes the modifications implied by the Basel II proposal. The volume has been written for academics as well as practitioners, in particular finance specialists. It is unique in bringing together such a wide array of experts and correspondingly offers

a complete coverage of recent developments in risk management.

The boom of internet is causing another industrial revolution. It is necessary for Chinese airlines to develop E-business in order to keep their competitive advantages. China Southern Airlines is the first Chinese airlines to enter E-business sector and is fairly successful

in Chinese civil aviation market. However, comparing with British Airways, current E-business strategy in this company quite falls behind. After a strategic analysis, it is clearly that E-business is a profitable strategy for China Southern Airlines and should be applied further. It is quite urgent for China Southern Airlines to enlarge and improve its E-business strategies so that it can consolidate its leading position in this market segment. Therefore, some reasonable future strategic choices are put forward and a recommendation is given. On the other hand, the explosion of Chinese economy provides a rapid growth of air traffic world widely. British

Airways and other foreign airlines would increase their profits significantly from Chinese air market. Entrepreneurship in Context John Wiley & Sons Provides insight into 150 US private companies. The directory contains articles from more than 150 sources, including trade and professional journals, business magazines, newspapers, investment reports and company brochures. Publications of the State of Illinois iUniverse Due to the high supply on the market, companies have to investigate and understand customer needs in order to adapt their products or services and to be competitive within the

highly rival market. It is also crucial to avoid any unethical behaviour, as this may lead to retrogressive turnover. This book focuses on the investigation of factors which determine consumer behaviour within the catering industry. To concretise this extensive area, this work will concentrate on Starbucks' tax avoidance in the United Kingdom in December 2012. As there are no relevant or current reports on Starbucks' tax avoidance and customer behaviour, the primary research on this issue will be done in this work. However, the literature review provides a comprehensive overview of relevant landmark studies of

customer satisfaction and previous research on customer behaviour within the catering industry. By means of a self-provided conceptual framework and an appropriate methodology a quantitative online questionnaire was created and implemented.

Much research in entrepreneurship presents results as if they are universally and timelessly valid. Entrepreneurship in Context takes the opposite tack - it studies entrepreneurship as a context bound phenomenon. For entrepreneurship, the importance of context goes beyond gaining understanding and

avoiding mistakes. The reciprocal influence exercised by the entrepreneurial venture and its corresponding context is at the very heart of the entrepreneur as an agent of change. The book addresses context in a narrow sense, i.e. a person's life situation and local, situational characteristics. It also deals with wider contexts such as social, industry, cultural, ethnic, sustainability-related, institutional, and historical contexts. The book studies the interconnectedness of all these various sub-contexts. It zooms in on the actions that entrepreneurs take to involve, engage, and influence their context and shows the changing and dynamic

nature of context. It provides lessons for entrepreneurs about

which contextual elements should be prioritized, engaged and sought out.
