KELLEY LAWRENCE

World of Darkness Second Sight B&H Publishing Group
 Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

Go Tell It on the Mountain Red Wheel/Weiser
 In the beginning, the World Wide Web was exciting and open to the point of anarchy, a vast and intimidating repository of unindexed confusion. Into this creative chaos came Google with its dazzling mission—"To organize the world's information and make it universally accessible"—and its much-quoted motto, "Don't be evil." In this provocative book, Siva Vaidhyanathan examines the ways we have used and embraced Google—and the growing resistance to its expansion across the globe. He exposes the dark side of our Google fantasies, raising red flags about issues of intellectual property and the much-touted Google Book Search. He assesses Google's global impact, particularly in China, and explains the insidious effect of Googlization on the way we think. Finally, Vaidhyanathan proposes the construction of an Internet ecosystem designed to benefit the whole world and keep one brilliant and powerful company from falling into the "evil" it pledged to avoid.

Qualitative Content Analysis in Practice Fernwood Publishing
 Using UFOs and the work of "experiencer" Whitley Strieber as its departure point, *Prisoner of Infinity* explores how beliefs are created and perceptions are managed in the face of the inexplicably complex forces of our existence. While keeping the question of a nonhuman and/or paranormal element open, the book maps how all-too-human agendas (such as the CIA's MK Ultra program) have co-opted the ancient psychological process of myth-making, giving rise to dissociative Hollywood versions of reality. *Prisoner of Infinity* examines modern-day accounts of UFOs, alien abductions, and psychism to uncover a century-long program of psychological fragmentation, collective indoctrination, and covert cultural, social, and mythic engineering.

Understanding Media HarperCollins
 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts,

medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. The Disappearing Spoon masterfully fuses science with the classic lore of invention, investigation, and discovery -- from the Big Bang through the end of time. Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

The classic thriller about a hostile foreign power infiltrating American politics: "Brilliant . . . wild and exhilarating." —The New Yorker
 A war hero and the recipient of the Congressional Medal of Honor, Sgt. Raymond Shaw is keeping a deadly secret—even from himself. During his time as a prisoner of war in North Korea, he was brainwashed by his Communist captors and transformed into a deadly weapon—a sleeper assassin, programmed to kill without question or mercy at his captors' signal. Now he's been returned to the United States with a covert mission: to kill a candidate running for US president . . . This "shocking, tense" and sharply satirical novel has become a modern classic, and was the basis for two film adaptations (San Francisco Chronicle). "Crammed with suspense." —Chicago Tribune "Condon is wickedly skillful." —Time

Brothers, We are Not Professionals Routledge

Qualitative content analysis is a powerful method for analyzing large amounts of qualitative data collected through interviews or focus groups. It is frequently employed by students, but introductory textbooks on content analysis have largely focused on the quantitative version of the method. In one of the first to focus on qualitative content analysis, Margrit Schreier takes students step-by-step through: - creating a coding frame - segmenting the material - trying out the coding frame - evaluating the trial coding - carrying out the main coding - what comes after qualitative content analysis - making use of software when conducting qualitative content analysis. Each part of the process is described in detail and research examples are provided to illustrate each step. Frequently asked questions are answered, the most important points are summarized, and end of chapter questions provide an opportunity to revise these points. After reading the book, students are fully equipped to conduct their own qualitative content analysis. Designed for upper level undergraduate, MA, PhD students and researchers across the social sciences, this is essential reading for all those who want to use qualitative content analysis.

In 1998 the author, a professional prankster, trademarked the phrase "freedom of expression" to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.

The Manchurian Candidate Bloomsbury Publishing USA

Why do underdogs succeed so much more than we expect? How do the weak outsmart the strong? In *David and Goliath* Malcolm Gladwell, no.1 bestselling author of *The Tipping Point*, *Blink*, *Outliers* and *What the Dog Saw*, takes us on a scintillating and surprising journey through the hidden dynamics that shape the balance of power between the small and the mighty. From the conflicts in Northern Ireland, through the tactics of civil rights leaders and the problem of privilege, Gladwell demonstrates how we misunderstand the true meaning of advantage and disadvantage. When does a traumatic childhood work in someone's favour? How can a disability leave someone better off?

And do you really want your child to go to the best school he or she can get into? David and Goliath draws on the stories of remarkable underdogs, history, science, psychology and on Malcolm Gladwell's unparalleled ability to make the connections others miss. It's a brilliant, illuminating book that overturns conventional thinking about power and advantage. 'A global phenomenon... there is, it seems, no subject over which he cannot scatter some magic dust' Observer

The Ruling Class John Wiley & Sons
Growing up the son of agnostics, John Koessler saw a Catholic church on one end of the street and a Baptist on the other. In the no-man's land between the two, this curious outside wondered about the God they worshipped—and began a lifelong search to comprehend the grace and mystery of God. A Stranger in the House of God addresses fundamental questions and struggles faced by spiritual seekers and mature believers. Like a contemporary Pilgrim's Progress, it traces the author's journey and explores his experiences with both charismatic and evangelical Christianity. It also describes his transformation from religious outsider to ordained pastor. John Koessler provides a poignant and often humorous window into the interior of the soul as he describes his journey from doubt and struggle with the church to personal faith

Beyond Unwanted Sound The Manchurian Candidate
Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

Masculinity without men. In *Female Masculinity* Judith Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two hundred years. Providing the first full-length study on this subject, Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth-century pre-lesbian practices to contemporary drag king performances. Through detailed textual readings as well as empirical research, Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them. She rereads Anne Lister's diaries and Radclyffe Hall's *The Well of Loneliness* as foundational assertions of female masculine identity. She considers the enigma of the stone butch and the politics surrounding butch/femme roles within lesbian communities. She also explores issues of transsexuality among "transgender dykes"—lesbians who pass as men—and female-to-male transsexuals who may find the label of "lesbian" a temporary refuge. Halberstam also tackles such topics as women and boxing, butches in Hollywood and independent cinema, and the phenomenon of male impersonators. *Female Masculinity* signals a new understanding of masculine behaviors and identities, and a new direction in interdisciplinary queer scholarship. Illustrated with nearly forty photographs, including portraits, film stills, and drag king performance shots, this book provides an extensive record of the wide range of female masculinities. And as Halberstam clearly demonstrates, female masculinity is not some bad imitation of virility, but a lively and dramatic staging of hybrid and minority genders.
