Though incarnational mission, or "embodying the message," is a popular idea among Christians, it often comes under theological fire. Is it simply trying to follow the example of Jesus in our own strength? Is it arrogant for Christians to compare their mission with the incarnating mission of Jesus Christ? Is the idea of God-becoming-flesh itself sustainable today as a basis for Christian mission? This study is the first to define the meanings attached to incarnational mission across a variety of Christian traditions. It proposes a balanced approach to incarnational approach to mission involving the three dimensions of following Jesus in costly discipleship, conforming to the risen Christ, and co-operating in the universal dynamic of God's self-embodiment.

The Gospel of John is the most deeply spiritual of the four gospels. This writing is filled with rich images and profound truths, but John notes that his aim in writing the gospel is that readers will not only believe in Jesus Christ, but that they "may have life in his name." Adults, youth, and children alike can experience a season of spiritual growth and life-changing renewal in Adam Hamilton's six-week, DVD-series, John: The Gospel of Light and Life. You'll follow the life, ministry, death, and resurrection of Jesus through the Gospel of John and understand the context of some of the best-known verses in the New Testament. Everything you need to lead small groups of all ages is available for this special study including the entire Gospel of John in the CEB translation printed in the book.

The author shows that "the ability to listen, to name one's feelings, to face conflict, to accept oneself, and speak clearly and honestly, are as closely related to witnessing the gospel as they are to expressing good mental health."

This 25-minute Christmas Nativity pageant tells the story of Jesus Christ from creation to present day. The birth of Christ is seen as an event with a much wider scope than an incident that occurred long ago in Bethlehem. This drama is unique in highlighting Jesus' birth as part of the greater picture of God's activity throughout history: in creation, in the words of the prophets, in the cross, in the resurrection, and in our world today. "The Word Became Flesh" provides drama that is biblically sound, educational, and thought-provoking. Shirley M. This book explores the much debated relation of language and bodily experience (i.e. the 'flesh'), considering in particular how poetry functions as revelatory discourse and thus relates to the formal horizon of theological inquiry. The central thematic focus is around a 'phenomenology of the flesh' as that which connects us with the world, being the site of perception and feeling, joy and suffering, and of life itself in all its vulnerability. The voices represented in this collection reflect

interdisciplinary methods of interpretation and broadly ecumenical sensibilities, focusing attention on such matters as the revelatory nature of language in general and poetic language in particular, the function of poetry in society, the question of Incarnation and its relation to language and the poetic arts, the kenosis of the Word, and human embodiment in relation to the word 'enfleshed' in poetry.

First published in 1920, "God-Man: The Word Made Flesh" by George Washington Carey and Inez Eudora Perry explores the intimate connection between the universe and the human body. Dr. Carey was born in 1845 and was an American medical doctor who wrote several books during the early twentieth-century on biochemistry, religion, astrology, physiology, and his mineral-based theory of the origin of human health and disease, which he called the "chemistry of life". In "God-Man: The Word Made Flesh". the authors examine some of the most important questions that have challenged humanity since the beginnings of Christianity, such as the relationship between the divine and the mortal and whether or not humans are born with sin and in need of salvation. Dr. Carey and his co-author Perry take the reader on a fascinating and in-depth study of ancient cultures, symbolism, astrology, mysticism, and spirituality, examining how these ideas relate to human health and physiology. "God-Man: The Word Made Flesh" explains many of the mysteries of the Bible and how these mysteries relate to human life on the macro and microcosm and the continued relevance of these spiritual concerns to modern health and wellness. This edition is printed on premium acid-free paper.

The Gospel According to John Moody Publishers

This systematic theology begins from the treatise De Deo Uno and develops the dogma of the Trinity as an expression of divine unicity, on which will depend creation, Christology, and ecclesiology. The Invisible God must be seen and known in the visible. In this way, God and God's relation to creation are distinguished but not separated from Christology, the doctrine of perfections from redemption. In the end, the transcendent beauty who is God can be known only in worship and praise.

"Collectively, the entries here are not a manifesto nor a theory. This is neither an academic treatise nor a textbook. What destruction is sought is a destruction of received consciousness, not a bomb thrown into a building or a classroom. They describe a theatre that does not exist, that may never exist except as an imaginative possibility in the mind of the dreamer." (From the "Preface for the author") --- "George Hunka's skills and experience as a dramatist and director are manifested, refracted, in *Word Made Flesh*, one of the most memorable, haunting and artful performances over which he has presided. ... Here we encounter Hunka's notated performance of the evolution of himself, man and artist, through proposition, interrogation, digression, impatience, righteous anger and a sensual delectation in thought and language. His focus is a theatre which does not seek to reproduce or represent life; but to re-present life, and the possibilities of the self in the world." (From the Afterword by David Ian Rabey, University of Wales, Aberystwyth)

Calling attention to the visual materiality of the text, this book attempts to halt linear reading, trapping the eye in a field of letters which make a complex object on the page. The writing refers continually to the visceral character of language, literalizing metaphors of tongue, breath, and flesh. The work both embodies and discusses language as a physical form, one whose properties cannot be ignored by arriving at a disembodied content. The format of this work invokes a reference to the *carmina figurata* of the Renaissance -- works in which a sacred image was picked out in red letters against a field of black type so that a holy figure could be seen and meditated on in the process of reading. The technique is reversed here, with the red field of small type serving as a background in which large, black letters are arranged like figures on the red ground. This is a facsimile reprint of an original letterpress edition issued in 1989.

From Nothing Abingdon Press

During the early nineteenth century, schools for the deaf appeared in the United States for the first time. These schools were committed to the use of the sign language to educate deaf students. Manual education made the growth of the deaf community possible, for it gathered deaf people together in sizable numbers for the first time in American history. It also fueled the emergence of Deaf culture, as the schools became agents of cultural transformations. Just as the Deaf community began to be recognized as a minority culture, in the 1850s, a powerful movement arose to undo it, namely oral education. Advocates of oral education, deeply influenced by the writings of public school pioneer Horace Mann, argued that deaf students should stop signing and should start speaking in the hope that the Deaf community would be abandoned, and its language and culture would vanish. In this revisionist history, *Words Made Flesh* explores the educational battles of the nineteenth century from both hearing and deaf points of view. It places the growth of the Deaf community at the heart of the story of deaf education and explains how the unexpected emergence of Deafness provoked the pedagogical battles that dominated the field of deaf education in the nineteenth century, and still reverberate today.

God, Sexuality and the Self is a new venture in systematic theology. Sarah Coakley invites the reader to re-conceive the relation of sexual desire and the desire for God and - through the lens of prayer practice - to chart the intrinsic connection of this relation to a theology of the Trinity. The goal is to integrate the demanding ascetical undertaking of prayer with the recovery of lost and neglected materials from the tradition and thus to reanimate doctrinal reflection both imaginatively and spiritually. What emerges is a vision of human longing for the triune God which is both edgy and compelling: Coakley's *théologie totale* questions standard shibboleths on 'sexuality' and 'gender' and thereby suggests a way beyond current destructive impasses in the churches. The book is clearly and accessibly written and will be of great interest to all scholars and students of theology.
